Table Of Contents

1. About this handbook	5
1.1. Notes and rules	5
1.1.1. Begin and completion of a module	5
1.1.2. Module versions	5
1.1.3. General and partial examinations	5
1.1.4. Types of exams	5
1.1.5. Repeating exams	5
1.1.6. Additional accomplishments	6
1.1.7. Further information	6
2. Qualification goals of the field of study.....	7
3. Study and examination regulations	8
4. Amendment statute 1.....	24
5. Amendment statute 2.....	27
6. Admission statute	30
7. Curriculum	39
8. Field of study structure	47
8.1. Orientation Exam	47
8.2. Bachelor's Thesis	47
8.3. Fundamentals of Engineering	47
8.4. Majors in Mechanical Engineering (International)	47
8.5. International Project Management and Soft Skills	48
8.6. Additional Examinations	48
9. Modules	49
9.1. Advanced Mathematics - M-MATH-104022	49
9.2. Bachelor's Thesis - M-MACH-103722	50
9.3. Computer Science [BSc-Modul 09, Inf] - M-MACH-102563	51
9.4. Electrical Engineering - M-ETIT-104049	52
9.5. Engineering Mechanics [BSc-Modul 03, TM] - M-MACH-102572	54
9.6. Fluid Mechanics [BSc-Modul 12, SL] - M-MACH-102565	56
9.7. International Project Management and Interdisciplinary Qualifications - M-MACH-103322	57
9.8. Machines and Processes [mach13BSc-Modul 13, MuP] - M-MACH-102566	59
9.9. Manufacturing Processes (MEI) - M-MACH-104232	60
9.10. Materials Science [BSc-Modul 04, WK] - M-MACH-102562	61
9.11. Measurement and Control Systems [BSc-Modul 11, MRT] - M-MACH-102564	63
9.12. Mechanical Design [BSc-Modul 06, MKL] - M-MACH-102573	65
9.13. MF A: Global Production Management - M-MACH-103351	68
9.14. MF B: Energy Engineering - M-MACH-103350	69
9.15. MF C: Automotive Engineering - M-MACH-103349	70
9.16. Orientation Exam - M-MACH-104162	71
9.17. Physics - M-PHYS-104030	72
9.18. Production Operations Management - M-MACH-105106	73
9.19. Supplementary Studies on Culture and Society - M-ZAK-106235	74
9.20. Supplementary Studies on Sustainable Development - M-ZAK-106099	77
9.21. Technical Thermodynamics [BSc-Modul 05, TTD] - M-MACH-102574	80
10. Courses	82
10.1. Advanced Mathematics I - T-MATH-108266	82
10.2. Advanced Mathematics I Prerequisite - T-MATH-108265	83
10.3. Advanced Mathematics II - T-MATH-108268	84
10.4. Advanced Mathematics II Prerequisite - T-MATH-108267	85
10.5. Advanced Mathematics III - T-MATH-108270	86
10.6. Advanced Mathematics III Prerequisite - T-MATH-108269	87
10.7. Automated Production Systems (MEI) - T-MACH-106732	88
10.8. Automotive Engineering I - T-MACH-100092	89
10.9. Automotive Engineering II - T-MACH-102117	91
10.10. Bachelor's Thesis - T-MACH-108685	93
10.11. Basics in Measurement and Control Systems - T-MACH-104745	94
10.12. Basics Module - Self Assignment BAK - T-ZAK-112653	97
10.13. Basics Module - Self Assignment BeNe - T-ZAK-112345	98

10.14. Basics of Manufacturing Technology (MEI) - T-MACH-108747	99
10.15. Civil Society and non-profit Organizations in democratic societies - T-ZAK-112807	101
10.16. Computer Science for Engineers - T-MACH-105205	102
10.17. Computer Science for Engineers, Prerequisite - T-MACH-105206	104
10.18. Deconstructing Unconscious Bias into Intercultural Competence: A neurological look into how the brain constructs reality - T-ZAK-112565	105
10.19. Do it! – Service-Learning for Prospective Mechanical Engineers - T-MACH-106700	107
10.20. Elective Module - Subject, Body, Individual: the Other Side of Sustainability - Self Assignment BeNe - T-ZAK-112349	108
10.21. Elective Module - Sustainability Assessment of Technology - Self Assignment BeNe - T-ZAK-112348	109
10.22. Elective Module - Sustainability in Culture, Economy and Society - Self Assignment BeNe - T-ZAK-112350	110
10.23. Elective Module - Sustainable Cities and Neighbourhoods - Self Assignment BeNe - T-ZAK-112347	111
10.24. Electrical Engineering and Electronics - T-ETIT-108386	112
10.25. Engineering Mechanics I - T-MACH-100282	113
10.26. Engineering Mechanics II - T-MACH-100283	114
10.27. Engineering Mechanics III & IV - T-MACH-105201	116
10.28. Environmentally Induced Migrants (EIMs) - T-ZAK-112570	119
10.29. Excercises in Technical Thermodynamics and Heat Transfer I - T-MACH-105204	120
10.30. Excercises in Technical Thermodynamics and Heat Transfer II - T-MACH-105288	121
10.31. Fluid Mechanics 1&2 - T-MACH-105207	122
10.32. Fundamentals of Combustion I - T-MACH-105213	124
10.33. Fundamentals of Energy Technology - T-MACH-105220	126
10.34. Global Logistics - T-MACH-105379	128
10.35. Global Production Engineering (MEI) - T-MACH-106731	130
10.36. Heat and Mass Transfer - T-MACH-105292	131
10.37. In-depth Module - Doing Culture - Self Assignment BAK - T-ZAK-112655	133
10.38. In-depth Module - Global Cultures - Self Assignment BAK - T-ZAK-112658	134
10.39. In-depth Module - Media & Aesthetics - Self Assignment BAK - T-ZAK-112656	135
10.40. In-depth Module - Spheres of Life - Self Assignment BAK - T-ZAK-112657	136
10.41. In-depth Module - Technology & Responsibility - Self Assignment BAK - T-ZAK-112654	137
10.42. Intercultural Communications: USA and Germany - T-ZAK-112564	138
10.43. Machine Dynamics - T-MACH-105210	139
10.44. Machines and Processes - T-MACH-105208	141
10.45. Machines and Processes, Prerequisite - T-MACH-105232	143
10.46. Materials Science I & II - T-MACH-105145	145
10.47. Materials Science Lab Course - T-MACH-105146	151
10.48. Mechanical Design I and II - T-MACH-105286	153
10.49. Mechanical Design I, Prerequisites - T-MACH-105282	155
10.50. Mechanical Design II, Prerequisites - T-MACH-105283	156
10.51. Mechanical Design III and IV - T-MACH-104810	157
10.52. Mechanical Design III, Tutorial - T-MACH-110955	159
10.53. Mechanical Design IV, Tutorial - T-MACH-110956	161
10.54. Oral Exam - Supplementary Studies on Culture and Society - T-ZAK-112659	162
10.55. Oral Exam - Supplementary Studies on Sustainable Development - T-ZAK-112351	163
10.56. Practice Module - T-ZAK-112660	164
10.57. Presentation - T-MACH-108684	165
10.58. Production Operations Management - T-MACH-110327	166
10.59. Production Operations Management-Project - T-MACH-110326	167
10.60. Self-Booking-BSc-SPZ-Graded - T-MACH-112569	168
10.61. Self-Booking-BSc-SPZ-Non-Graded - T-MACH-112568	169
10.62. Self-Booking-BSc-StK-Graded - T-MACH-112681	170
10.63. Self-Booking-BSc-StK-Non-Graded - T-MACH-112680	171
10.64. Specialisation Module - Self Assignment BeNe - T-ZAK-112346	172
10.65. Steering of a Global Operating Company - The Robert BOSCH GmbH as an Example - T-MACH-110961	173
10.66. Technical Thermodynamics and Heat Transfer I - T-MACH-104747	175
10.67. Technical Thermodynamics and Heat Transfer II - T-MACH-105287	177
10.68. The impact of sustainable steering: Insights for holistic decision-making - T-ZAK-113411	178
10.69. Tutorial Engineering Mechanics I - T-MACH-100528	179
10.70. Tutorial Engineering Mechanics II - T-MACH-100284	180
10.71. Tutorial Engineering Mechanics III - T-MACH-105202	181
10.72. Tutorial Engineering Mechanics IV - T-MACH-105203	182
10.73. Vehicle Comfort and Acoustics I - T-MACH-105154	183
10.74. Vehicle Comfort and Acoustics II - T-MACH-105155	185

10.75. Virtual Engineering (Specific Topics) - T-MACH-105381	187
10.76. Wave and Quantum Physics - T-PHYS-108322	188
10.77. Working Methods in Mechanical Engineering - T-MACH-105296	189

1 About this handbook

1.1 Notes and rules

The program exists of several **subjects** (e.g. Fundamentals of Engineering). Every subject is split into **modules** and every module itself consists of one or more interrelated **module component exams**. The extent of every module is indicated by credit points (CP), which will be credited after the successful completion of the module. Some of the modules are **obligatory**. According to the interdisciplinary character of the program, a great variety of **individual specialization and deepening possibilities** exists for a large number of modules. This enables the student to customize content and time schedule of the program according to personal needs, interest and job perspective. The **module handbook** describes the modules belonging to the program. It describes particularly:

- the structure of the modules
- the extent (in CP),
- the dependencies of the modules,
- the learning outcomes,
- the assessment and examinations.

The module handbook serves as a necessary orientation and as a helpful guide throughout the studies. The module handbook does not replace the **course catalog**, which provides important information concerning each semester and variable course details (e.g. time and location of the course).

1.1.1 Begin and completion of a module

Each module and each examination can only be selected once. The decision on the assignment of an examination to a module (if, for example, an examination in several modules is selectable) is made by the student at the moment when he / she is registered for the appropriate examination. A module is completed or passed when the module examination is passed (grade 4.0 or better). For modules in which the module examination is carried out over several partial examinations, the following applies: The module is completed when all necessary module partial examinations have been passed. In the case of modules which offer alternative partial examinations, the module examination is concluded with the examination with which the required total credit points are reached or exceeded. The module grade, however, is combined with the weight of the predefined credit points for the module in the overall grade calculation.

1.1.2 Module versions

It is not uncommon for modules to be revised due to, for example, new courses or cancelled examinations. As a rule, a new module version is created, which applies to all students who are new to the module. On the other hand, students who have already started the module enjoy confidence and remain in the old module version. These students can complete the module on the same conditions as at the beginning of the module (exceptions are regulated by the examination committee). The date of the student's "binding declaration" on the choice of the module in the sense of §5(2) of the Study and Examination Regulation is decisive. This binding declaration is made by registering for the first examination in this module.

In the module handbook, all modules are presented in their current version. The version number is given in the module description. Older module versions can be accessed via the previous module handbooks in the archive.

1.1.3 General and partial examinations

Module examinations can be either taken in a general examination or in partial examinations. If the module examination is offered as a general examination, the entire learning content of the module will be examined in a single examination. If the module examination is subdivided into partial examinations, the content of each course will be examined in corresponding partial examinations. Registration for examinations can be done online at the campus management portal. The following functions can be accessed on <https://campus.studium.kit.edu/>:

- Register/unregister for examinations
- Check for examination results
- Create transcript of records

For further and more detailed information, <https://studium.kit.edu/Seiten/FAQ.aspx>.

1.1.4 Types of exams

Exams are split into written exams, oral exams and alternative exam assessments. Exams are always graded. Non exam assessments can be repeated several times and are not graded.

1.1.5 Repeating exams

Principally, a failed written exam, oral exam or alternative exam assessment can be repeated only once. If the repeat examination (including an eventually provided verbal repeat examination) will be failed as well, the examination claim is lost. A request for a second repetition has to be made in written form to the examination committee two months after losing the examination claim.

1.1.6 Additional accomplishments

Additional accomplishments are voluntarily taken exams, which have no impact on the overall grade of the student and can take place on the level of single courses or on entire modules. It is also mandatory to declare an additional accomplishment as such at the time of registration for an exam.

1.1.7 Further information

More detailed information about the legal and general conditions of the program can be found in the examination regulation of the program (<http://www.sle.kit.edu/amtlicheBekanntmachungen.php>).

Qualification Goals Mechanical Engineering (International) (B.Sc.)

By way of research and practical orientation of the six-semester, English-taught Bachelor's degree program for Mechanical Engineering (International) at KIT, graduates of the program are prepared for lifelong learning and employment in typical professional fields of mechanical engineering either in private industry, services and public administration.

They acquire the necessary communicative, organizational, social, and intercultural skills to pursue careers in international companies and organizations. Graduates acquire the academic qualifications to pursue a Master's degree program in Mechanical Engineering or related disciplines.

Within the fundamental subjects of their studies, graduates acquire sound basic knowledge in mathematics, mechanics and materials science, plus practical skills in design and construction, logistics, management, manufacturing and production planning. This is complemented by basic knowledge in electrical engineering, information technology, and natural sciences. In the field of business management international standards in accounting, company structures and international law receive special attention.

This in-depth knowledge of scientific theories, principles and methods allows graduates to successfully solve specific tasks of mechanical engineering using a unique approach. Through project work in international teams graduates are well prepared for the technical and practical requirements of the engineering profession in an increasingly globalized economy. Their intercultural skills acquired during the study coursework enable graduates to act responsibly and appropriately in each situation within an international business environment.

In their major subjects, complementary subjects and in their thesis project graduates develop cross-disciplinary research, problem-solving and planning skills for technical systems by using a combination of theoretical and practical approaches. Throughout the program the acquisition of skills is based on international standards. Graduates have the qualification to proficiently assess technical systems in their specific fields and they are able to generalize results and to generate new solutions.

Amtliche Bekanntmachung

2017

Studien- und Prüfungsordnung des Karlsruher Instituts für Technologie (KIT) für den Bachelorstudiengang Mechanical Engineering (International)	430
---	------------

**Studien- und Prüfungsordnung
des Karlsruher Instituts für Technologie (KIT) für den Bachelorstudiengang
Mechanical Engineering (International)**

vom 19. Juli 2017

Aufgrund von § 10 Absatz 2 Ziff. 5 und § 20 Absatz 2 Satz 1 des Gesetzes über das Karlsruher Institut für Technologie (KIT-Gesetz - KITG) in der Fassung vom 14. Juli 2009 (GBl. S. 317 f), zuletzt geändert durch Artikel 5 des Dritten Gesetzes zur Änderung hochschulrechtlicher Vorschriften (3. Hochschulrechtsänderungsgesetz – 3. HRÄG) vom 01. April 2014 (GBl. S. 99, 167) und § 32 Absatz 3 Satz 1 des Gesetzes über die Hochschulen in Baden-Württemberg (Landeshochschulgesetz - LHG) in der Fassung vom 1. Januar 2005 (GBl. S. 1 f zuletzt geändert durch Artikel 2 des Gesetzes zur Verwirklichung der Chancengleichheit von Frauen und Männern im öffentlichen Dienst in Baden-Württemberg und zur Änderung des Landeshochschulgesetzes vom 23. Februar 2016 (GBl. S. 108, 118), hat der Senat des KIT am 19. Dezember 2016 die folgende Studien- und Prüfungsordnung für den Bachelorstudiengang Mechanical Engineering (International) beschlossen.

Der Präsident hat seine Zustimmung gemäß § 20 Absatz 2 Satz 1 KITG i.V.m. § 32 Absatz 3 Satz 1 LHG am 19. Juli 2017 erteilt.

Inhaltsverzeichnis

I. Allgemeine Bestimmungen

- § 1 Geltungsbereich
- § 2 Ziele des Studiums, akademischer Grad
- § 3 Regelstudienzeit, Studienaufbau, Leistungspunkte
- § 4 Modulprüfungen, Studien- und Prüfungsleistungen
- § 5 Anmeldung und Zulassung zu den Modulprüfungen und Lehrveranstaltungen
- § 6 Durchführung von Erfolgskontrollen
 - § 6 a Erfolgskontrollen im Antwort-Wahl-Verfahren
 - § 6 b Computergestützte Erfolgskontrollen
- § 7 Bewertung von Studien- und Prüfungsleistungen
- § 8 Orientierungsprüfungen, Verlust des Prüfungsanspruchs
- § 9 Wiederholung von Erfolgskontrollen, endgültiges Nichtbestehen
- § 10 Abmeldung; Versäumnis, Rücktritt
- § 11 Täuschung, Ordnungsverstoß
- § 12 Mutterschutz, Elternzeit, Wahrnehmung von Familienpflichten
- § 13 Studierende mit Behinderung oder chronischer Erkrankung
- § 14 Modul Bachelorarbeit
- § 15 Zusatzleistungen
- § 15 a Mastervorzug

- § 16 Überfachliche Qualifikationen
- § 17 Prüfungsausschuss
- § 18 Prüfende und Beisitzende
- § 19 Anerkennung von Studien- und Prüfungsleistungen, Studienzeiten

II. Bachelorprüfung

- § 20 Umfang und Art der Bachelorprüfung
- § 21 Bestehen der Bachelorprüfung, Bildung der Gesamtnote
- § 22 Bachelorzeugnis, Bachelorurkunde, Diploma Supplement und Transcript of Records

III. Schlussbestimmungen

- § 23 Bescheinigung von Prüfungsleistungen
- § 24 Aberkennung des Bachelorgrades
- § 25 Einsicht in die Prüfungsakten

Präambel

Das KIT hat sich im Rahmen der Umsetzung des Bolognaprozesses zum Aufbau eines europäischen Hochschulraumes zum Ziel gesetzt, dass am Abschluss des Studiums am KIT der Mastergrad stehen soll. Das KIT sieht daher die am KIT angebotenen konsekutiven Bachelor- und Masterstudiengänge als Gesamtkonzept mit konsekutivem Curriculum.

I. Allgemeine Bestimmungen

§ 1 Geltungsbereich

Diese Bachelorprüfungsordnung regelt Studienablauf, Prüfungen und den Abschluss des Studiums im englischsprachigen Bachelorstudiengang Mechanical Engineering (International) am KIT.

§ 2 Ziel des Studiums, akademischer Grad

(1) Im Bachelorstudium sollen die wissenschaftlichen Grundlagen und die Methodenkompetenz der Fachwissenschaften vermittelt werden. Ziel des Studiums ist die Fähigkeit, einen konsekutiven Masterstudiengang erfolgreich absolvieren zu können sowie das erworbene Wissen berufsfeldbezogen anwenden zu können.

(2) Aufgrund der bestandenen Bachelorprüfung wird der akademische Grad „Bachelor of Science (B.Sc.)“ für den Bachelorstudiengang Mechanical Engineering (International) verliehen.

§ 3 Regelstudienzeit, Studienaufbau, Leistungspunkte

(1) Die Regelstudienzeit beträgt sechs Semester.

(2) Das Lehrangebot des Studiengangs ist in Fächer, die Fächer sind in Module, die jeweiligen Module in Lehrveranstaltungen gegliedert. Die Fächer und ihr Umfang werden in § 20 festgelegt. Näheres beschreibt das Modulhandbuch.

(3) Der für das Absolvieren von Lehrveranstaltungen und Modulen vorgesehene Arbeitsaufwand wird in Leistungspunkten (LP) ausgewiesen. Die Maßstäbe für die Zuordnung von Leistungspunkten entsprechen dem European Credit Transfer System (ECTS). Ein Leistungspunkt entspricht einem Arbeitsaufwand von etwa 30 Zeitstunden. Die Verteilung der Leistungspunkte auf die Semester hat in der Regel gleichmäßig zu erfolgen.

(4) Der Umfang der für den erfolgreichen Abschluss des Studiums erforderlichen Studien- und Prüfungsleistungen wird in Leistungspunkten gemessen und beträgt insgesamt 180 Leistungspunkte.

(5) Lehrveranstaltungen werden in englischer Sprache angeboten.

§ 4 Modulprüfungen, Studien- und Prüfungsleistungen

(1) Die Bachelorprüfung besteht aus Modulprüfungen. Modulprüfungen bestehen aus einer oder mehreren Erfolgskontrollen.

Erfolgskontrollen gliedern sich in Studien- oder Prüfungsleistungen.

(2) Prüfungsleistungen sind:

1. schriftliche Prüfungen,
2. mündliche Prüfungen oder
3. Prüfungsleistungen anderer Art.

(3) Studienleistungen sind schriftliche, mündliche oder praktische Leistungen, die von den Studierenden in der Regel lehrveranstaltungsbegleitend erbracht werden. Die Bachelorprüfung darf nicht mit einer Studienleistung abgeschlossen werden.

(4) Von den Modulprüfungen sollen mindestens 70 % benotet sein.

(5) Bei sich ergänzenden Inhalten können die Modulprüfungen mehrerer Module durch eine auch modulübergreifende Prüfungsleistung (Absatz 2 Nr.1 bis 3) ersetzt werden.

§ 5 Anmeldung und Zulassung zu den Modulprüfungen und Lehrveranstaltungen

(1) Um an den Modulprüfungen teilnehmen zu können, müssen sich die Studierenden online im Studierendenportal zu den jeweiligen Erfolgskontrollen anmelden. In Ausnahmefällen kann eine Anmeldung schriftlich im Studierendenservice oder in einer anderen vom Studierendenservice autorisierten Einrichtung erfolgen. Für die Erfolgskontrollen können durch die Prüfenden Anmeldefristen festgelegt werden. Die Anmeldung der Bachelorarbeit ist im Modulhandbuch geregelt.

(2) Sofern Wahlmöglichkeiten bestehen, müssen Studierende, um zu einer Prüfung in einem bestimmten Modul zugelassen zu werden, vor der ersten Prüfung in diesem Modul mit der Anmeldung zu der Prüfung eine bindende Erklärung über die Wahl des betreffenden Moduls und dessen Zuordnung zu einem Fach abgeben. Auf Antrag des/der Studierenden an den Prüfungsausschuss kann die Wahl oder die Zuordnung nachträglich geändert werden. Ein begonnenes Prüfungsverfahren ist zu beenden, d. h. eine erstmals nicht bestandene Prüfung ist zu wiederholen. Sofern bereits ein Prüfungsverfahren in einem Modul begonnen wurde, ist die Änderung der Wahl oder der Zuordnung erst nach Beendigung des Prüfungsverfahrens zulässig; dies gilt nur für Prüfungsleistungen.

(3) Zu einer Erfolgskontrolle ist zuzulassen, wer

1. in den Bachelorstudiengang Mechanical Engineering (International) am KIT eingeschrieben ist; die Zulassung beurlaubter Studierender ist auf Prüfungsleistungen beschränkt; und
2. nachweist, dass er die im Modulhandbuch für die Zulassung zu einer Erfolgskontrolle festgelegten Voraussetzungen erfüllt und
3. nachweist, dass er in dem Bachelorstudiengang Mechanical Engineering (International) den Prüfungsanspruch nicht verloren hat.

(4) Nach Maßgabe von § 30 Abs. 5 LHG kann die Zulassung zu einzelnen Pflichtveranstaltungen beschränkt werden. Der/die Prüfende entscheidet über die Auswahl unter den Studierenden, die sich rechtzeitig bis zu dem von dem/der Prüfenden festgesetzten Termin angemeldet haben unter Berücksichtigung des Studienfortschritts dieser Studierenden und unter Beachtung von § 13 Abs. 1 Satz 1 und 2, sofern ein Abbau des Überhangs durch andere oder zusätzliche Veranstaltungen nicht möglich ist. Für den Fall gleichen Studienfortschritts sind durch die KIT-Fakultäten weitere Kriterien festzulegen. Das Ergebnis wird den Studierenden rechtzeitig bekannt gegeben.

(5) Die Zulassung ist abzulehnen, wenn die in Absatz 3 und 4 genannten Voraussetzungen nicht erfüllt sind.

§ 6 Durchführung von Erfolgskontrollen

(1) Erfolgskontrollen werden studienbegleitend, in der Regel im Verlauf der Vermittlung der Lehrinhalte der einzelnen Module oder zeitnah danach, durchgeführt.

(2) Die Art der Erfolgskontrolle (§ 4 Abs. 2 Nr. 1 bis 3, Abs. 3) wird von der/dem Prüfenden der betreffenden Lehrveranstaltung in Bezug auf die Lerninhalte der Lehrveranstaltung und die Lernziele des Moduls festgelegt. Die Art der Erfolgskontrolle, ihre Häufigkeit, Reihenfolge und Gewichtung sowie gegebenenfalls die Bildung der Modulnote müssen mindestens sechs Wochen vor Vorlesungsbeginn im Modulhandbuch bekannt gemacht werden. Im Einvernehmen von Prüfendem und Studierender bzw. Studierendem können die Art der Prüfungsleistung sowie die Prüfungssprache auch nachträglich geändert werden; im ersten Fall ist jedoch § 4 Abs. 5 zu be-

rücksichtigen. Bei der Prüfungsorganisation sind die Belange Studierender mit Behinderung oder chronischer Erkrankung gemäß § 13 Abs. 1 zu berücksichtigen. § 13 Abs. 1 Satz 3 und 4 gelten entsprechend.

(3) Bei unvertretbar hohem Prüfungsaufwand kann eine schriftlich durchzuführende Prüfungsleistung auch mündlich, oder eine mündlich durchzuführende Prüfungsleistung auch schriftlich abgenommen werden. Diese Änderung muss mindestens sechs Wochen vor der Prüfungsleistung bekannt gegeben werden.

(4) Erfolgskontrollen werden in englischer Sprache abgenommen.

(5) *Schriftliche Prüfungen* (§ 4 Abs. 2 Nr. 1) sind in der Regel von einer/einem Prüfenden nach § 18 Abs. 2 oder 3 zu bewerten. Sofern eine Bewertung durch mehrere Prüfende erfolgt, ergibt sich die Note aus dem arithmetischen Mittel der Einzelbewertungen. Entspricht das arithmetische Mittel keiner der in § 7 Abs. 2 Satz 2 definierten Notenstufen, so ist auf die nächstliegende Notenstufe auf- oder abzurunden. Bei gleichem Abstand ist auf die nächstbessere Notenstufe zu runden. Das Bewertungsverfahren soll sechs Wochen nicht überschreiten. Schriftliche Prüfungen dauern mindestens 60 und höchstens 300 Minuten.

(6) *Mündliche Prüfungen* (§ 4 Abs. 2 Nr. 2) sind von mehreren Prüfenden (Kollegialprüfung) oder von einer/einem Prüfenden in Gegenwart einer oder eines Beisitzenden als Gruppen- oder Einzelprüfungen abzunehmen und zu bewerten. Vor der Festsetzung der Note hört die/der Prüfende die anderen an der Kollegialprüfung mitwirkenden Prüfenden an. Mündliche Prüfungen dauern in der Regel mindestens 15 Minuten und maximal 60 Minuten pro Studierenden.

Die wesentlichen Gegenstände und Ergebnisse der *mündlichen Prüfung* sind in einem Protokoll festzuhalten. Das Ergebnis der Prüfung ist den Studierenden im Anschluss an die mündliche Prüfung bekannt zu geben.

Studierende, die sich in einem späteren Semester der gleichen Prüfung unterziehen wollen, werden entsprechend den räumlichen Verhältnissen und nach Zustimmung des Prüflings als Zuhörerinnen und Zuhörer bei mündlichen Prüfungen zugelassen. Die Zulassung erstreckt sich nicht auf die Beratung und Bekanntgabe der Prüfungsergebnisse.

(7) Für *Prüfungsleistungen anderer Art* (§ 4 Abs. 2 Nr. 3) sind angemessene Bearbeitungsfristen einzuräumen und Abgabetermine festzulegen. Dabei ist durch die Art der Aufgabenstellung und durch entsprechende Dokumentation sicherzustellen, dass die erbrachte Prüfungsleistung dem/der Studierenden zurechenbar ist. Die wesentlichen Gegenstände und Ergebnisse einer solchen Erfolgskontrolle sind in einem Protokoll festzuhalten.

Bei *mündlich* durchgeführten *Prüfungsleistungen anderer Art* muss neben der/dem Prüfenden ein/e Beisitzende/r anwesend sein, die/der zusätzlich zum/zur Prüfenden das Protokoll zeichnet.

Schriftliche Arbeiten im Rahmen einer *Prüfungsleistung anderer Art* haben dabei die folgende Erklärung zu tragen: „Ich versichere wahrheitsgemäß, die Arbeit selbstständig angefertigt, alle benutzten Hilfsmittel vollständig und genau angegeben und alles kenntlich gemacht zu haben, was aus Arbeiten anderer unverändert oder mit Abänderungen entnommen wurde.“ Trägt die Arbeit diese Erklärung nicht, wird sie nicht angenommen. Die wesentlichen Gegenstände und Ergebnisse der Erfolgskontrolle sind in einem Protokoll festzuhalten.

§ 6 a Erfolgskontrollen im Antwort-Wahl-Verfahren

Das Modulhandbuch regelt, ob und in welchem Umfang Erfolgskontrollen im Wege des *Antwort-Wahl-Verfahrens* abgelegt werden können

§ 6 b Computergestützte Erfolgskontrollen

(1) Erfolgskontrollen können computergestützt durchgeführt werden. Dabei wird die Antwort bzw. Lösung der/des Studierenden elektronisch übermittelt und, sofern möglich, automatisiert ausgewertet. Die Prüfungsinhalte sind von einer/einem Prüfenden zu erstellen.

(2) Vor der computergestützten Erfolgskontrolle hat die/der Prüfende sicherzustellen, dass die elektronischen Daten eindeutig identifiziert und unverwechselbar und dauerhaft den Studierenden zugeordnet werden können. Der störungsfreie Verlauf einer computergestützten Erfolgskontrolle ist durch entsprechende technische und fachliche Betreuung zu gewährleisten. Alle Prüfungsaufgaben müssen während der gesamten Bearbeitungszeit zur Bearbeitung zur Verfügung stehen.

(3) Im Übrigen gelten für die Durchführung von computergestützten Erfolgskontrollen die §§ 6 bzw. 6 a.

§ 7 Bewertung von Studien- und Prüfungsleistungen

(1) Das Ergebnis einer Prüfungsleistung wird von den jeweiligen Prüfenden in Form einer Note festgesetzt.

(2) Folgende Noten sollen verwendet werden:

sehr gut (very good)	:	hervorragende Leistung,
gut (good)	:	eine Leistung, die erheblich über den durchschnittlichen Anforderungen liegt,
befriedigend (satisfactory)	:	eine Leistung, die durchschnittlichen Anforderungen entspricht,
ausreichend (sufficient)	:	eine Leistung, die trotz ihrer Mängel noch den Anforderungen genügt,
nicht ausreichend (failed)	:	eine Leistung, die wegen erheblicher Mängel nicht den Anforderungen genügt.

Zur differenzierten Bewertung einzelner Prüfungsleistungen sind nur folgende Noten zugelassen:

1,0; 1,3	:	sehr gut (very good)
1,7; 2,0; 2,3	:	gut (good)
2,7; 3,0; 3,3	:	befriedigend (satisfactory)
3,7; 4,0	:	ausreichend (sufficient)
5,0	:	nicht ausreichend (failed)

(3) Studienleistungen werden mit „bestanden (passed)“ oder mit „nicht bestanden (not passed)“ gewertet.

(4) Bei der Bildung der gewichteten Durchschnitte der Modulnoten, der Fachnoten und der Gesamtnote wird nur die erste Dezimalstelle hinter dem Komma berücksichtigt; alle weiteren Stellen werden ohne Rundung gestrichen.

(5) Jedes Modul und jede Erfolgskontrolle darf in demselben Studiengang nur einmal gewertet werden.

(6) Eine Prüfungsleistung ist bestanden, wenn die Note mindestens „ausreichend (sufficient)“ (4,0) ist.

(7) Die Modulprüfung ist bestanden, wenn alle erforderlichen Erfolgskontrollen bestanden sind. Die Modulprüfung und die Bildung der Modulnote sollen im Modulhandbuch geregelt werden. Sofern das Modulhandbuch keine Regelung über die Bildung der Modulnote enthält, errechnet sich die Modulnote aus einem nach den Leistungspunkten der einzelnen Teilmodule gewichteten Notendurchschnitt. Die differenzierten Noten (Absatz 2) sind bei der Berechnung der Modulnoten als Ausgangsdaten zu verwenden.

(8) Die Ergebnisse der Erfolgskontrollen sowie die erworbenen Leistungspunkte werden durch den Studierendenservice des KIT verwaltet.

(9) Die Noten der Module eines Faches gehen in die Fachnote mit einem Gewicht proportional zu den ausgewiesenen Leistungspunkten der Module ein.

(10) Die Gesamtnote der Bachelorprüfung, die Fachnoten und die Modulnoten lauten:

bis 1,5 = sehr gut (very good)

von 1,6 bis 2,5 = gut (good)

von 2,6 bis 3,5 = befriedigend (satisfactory)

von 3,6 bis 4,0 = ausreichend (sufficient)

§ 8 Orientierungsprüfungen, Verlust des Prüfungsanspruchs

(1) Die Teilmodulprüfungen Advanced Mathematics I, Engineering Mechanics I und Engineering Mechanics II in den Modulen Advanced Mathematics und Engineering Mechanics sind bis zum Ende des Prüfungszeitraums des zweiten Fachsemesters abzulegen (Orientierungsprüfungen).

(2) Wer die Orientierungsprüfungen einschließlich etwaiger Wiederholungen bis zum Ende des Prüfungszeitraums des dritten Fachsemesters nicht erfolgreich abgelegt hat, verliert den Prüfungsanspruch im Studiengang, es sei denn, dass die Fristüberschreitung nicht selbst zu vertreten ist; hierüber entscheidet der Prüfungsausschuss auf Antrag der oder des Studierenden. Eine zweite Wiederholung der Orientierungsprüfungen ist ausgeschlossen.

(3) Ist die Bachelorprüfung bis zum Ende des Prüfungszeitraums des neunten Fachsemesters einschließlich etwaiger Wiederholungen nicht vollständig abgelegt, so erlischt der Prüfungsanspruch im Bachelorstudiengang Mechanical Engineering (International), es sei denn, dass die Fristüberschreitung nicht selbst zu vertreten ist. Die Entscheidung über eine Fristverlängerung und über Ausnahmen von der Fristregelung trifft der Prüfungsausschuss unter Beachtung der in § 32 Abs. 6 LHG genannten Tätigkeiten auf Antrag des/der Studierenden. Der Antrag ist schriftlich, in der Regel bis sechs Wochen vor Ablauf der in Satz 1 genannten Studienhöchstdauer, zu stellen.

(4) Der Prüfungsanspruch geht auch verloren, wenn eine nach dieser Studien- und Prüfungsordnung erforderliche Studien- oder Prüfungsleistung endgültig nicht bestanden ist oder eine Wiederholungsprüfung nach § 9 Abs. 6 nicht rechtzeitig erbracht wurde, es sei denn die Fristüberschreitung ist nicht selbst zu vertreten.

§ 9 Wiederholung von Erfolgskontrollen, endgültiges Nichtbestehen

(1) Studierende können eine nicht bestandene schriftliche Prüfung (§ 4 Absatz 2 Nr. 1) einmal wiederholen. Wird eine schriftliche Wiederholungsprüfung mit „nicht ausreichend (failed)“ (5,0) bewertet, so findet eine mündliche Nachprüfung im zeitlichen Zusammenhang mit dem Termin der nicht bestandenen Prüfung statt. In diesem Falle kann die Note dieser Prüfung nicht besser als „ausreichend (sufficient)“ (4,0) sein.

(2) Studierende können eine nicht bestandene mündliche Prüfung (§ 4 Absatz 2 Nr. 2) einmal wiederholen.

(3) Wiederholungsprüfungen nach Absatz 1 und 2 müssen in Inhalt, Umfang und Form (mündlich oder schriftlich) der ersten entsprechen. Ausnahmen kann der zuständige Prüfungsausschuss auf Antrag zulassen.

(4) Prüfungsleistungen anderer Art (§ 4 Absatz 2 Nr. 3) können einmal wiederholt werden.

(5) Studienleistungen können mehrfach wiederholt werden.

(6) Die Wiederholung von Prüfungsleistungen hat spätestens bis zum Ende des Prüfungszeitraums des übernächsten Semesters zu erfolgen.

(7) Die Prüfungsleistung ist endgültig nicht bestanden, wenn die mündliche Nachprüfung im Sinne des Absatzes 1 mit „nicht ausreichend (failed)“ (5,0) bewertet wurde. Die Prüfungsleistung ist ferner endgültig nicht bestanden, wenn die mündliche Prüfung im Sinne des Absatzes 2 oder die Prüfungsleistung anderer Art gemäß Absatz 4 zweimal mit „nicht bestanden (not passed)“ bewertet wurde.

(8) Das Modul ist endgültig nicht bestanden, wenn eine für sein Bestehen erforderliche Prüfungsleistung endgültig nicht bestanden ist.

(9) Eine zweite Wiederholung derselben Prüfungsleistung gemäß § 4 Abs. 2 ist nur in Ausnahmefällen auf Antrag des/der Studierenden zulässig („Antrag auf Zweitwiederholung“). Der Antrag ist schriftlich beim Prüfungsausschuss in der Regel bis zwei Monate nach Bekanntgabe der Note zu stellen.

Über den ersten Antrag eines/einer Studierenden auf Zweitwiederholung entscheidet der Prüfungsausschuss, wenn er den Antrag genehmigt. Wenn der Prüfungsausschuss diesen Antrag ablehnt, entscheidet ein Mitglied des Präsidiums. Über weitere Anträge auf Zweitwiederholung entscheidet nach Stellungnahme des Prüfungsausschusses ein Mitglied des Präsidiums. Wird der Antrag genehmigt, hat die Zweitwiederholung spätestens zum übernächsten Prüfungstermin zu erfolgen. Absatz 1 Satz 2 und 3 gelten entsprechend.

(10) Die Wiederholung einer bestandenen Prüfungsleistung ist nicht zulässig.

(11) Die Bachelorarbeit kann bei einer Bewertung mit „nicht ausreichend (failed)“ (5,0) einmal wiederholt werden. Eine zweite Wiederholung der Bachelorarbeit ist ausgeschlossen.

§ 10 Abmeldung; Versäumnis, Rücktritt

(1) Studierende können ihre Anmeldung zu *schriftlichen Prüfungen* ohne Angabe von Gründen bis zur Ausgabe der Prüfungsaufgaben widerrufen (Abmeldung). Eine Abmeldung kann online im Studierendenportal bis 24:00 Uhr des Vortages der Prüfung oder in begründeten Ausnahmefällen beim Studierendenservice innerhalb der Geschäftszeiten erfolgen. Erfolgt die Abmeldung gegenüber dem/der Prüfenden, hat diese/r Sorge zu tragen, dass die Abmeldung im Campus Management System verbucht wird.

(2) Bei *mündlichen Prüfungen* muss die Abmeldung spätestens drei Werkstage vor dem betreffenden Prüfungstermin gegenüber dem/der Prüfenden erklärt werden. Der Rücktritt von einer mündlichen Prüfung weniger als drei Werkstage vor dem betreffenden Prüfungstermin ist nur unter den Voraussetzungen des Absatzes 5 möglich. Der Rücktritt von mündlichen Nachprüfungen im Sinne von § 9 Abs. 1 ist grundsätzlich nur unter den Voraussetzungen von Absatz 5 möglich.

(3) Die Abmeldung von *Prüfungsleistungen anderer Art* sowie von *Studienleistungen* ist im Modulhandbuch geregelt.

(4) Eine Erfolgskontrolle gilt als mit „nicht ausreichend (failed)“ (5,0) bewertet, wenn die Studierenden einen Prüfungstermin ohne triftigen Grund versäumen oder wenn sie nach Beginn der Erfolgskontrolle ohne triftigen Grund von dieser zurücktreten. Dasselbe gilt, wenn die Bachelorarbeit nicht innerhalb der vorgesehenen Bearbeitungszeit erbracht wird, es sei denn, der/die Studierende hat die Fristüberschreitung nicht zu vertreten.

(5) Der für den Rücktritt nach Beginn der Erfolgskontrolle oder das Versäumnis geltend gemachte Grund muss dem Prüfungsausschuss unverzüglich schriftlich angezeigt und glaubhaft gemacht werden. Bei Krankheit des/der Studierenden oder eines allein zu versorgenden Kindes oder pflegebedürftigen Angehörigen kann die Vorlage eines ärztlichen Attestes verlangt werden.

§ 11 Täuschung, Ordnungsverstoß

- (1) Versuchen Studierende das Ergebnis ihrer Erfolgskontrolle durch Täuschung oder Benutzung nicht zugelassener Hilfsmittel zu beeinflussen, gilt die betreffende Erfolgskontrolle als mit „nicht ausreichend (failed)“ (5,0) bewertet.
- (2) Studierende, die den ordnungsgemäßen Ablauf einer Erfolgskontrolle stören, können von der/dem Prüfenden oder der Aufsicht führenden Person von der Fortsetzung der Erfolgskontrolle ausgeschlossen werden. In diesem Fall gilt die betreffende Erfolgskontrolle als mit „nicht ausreichend (failed)“ (5,0) bewertet. In schwerwiegenden Fällen kann der Prüfungsausschuss diese Studierenden von der Erbringung weiterer Erfolgskontrollen ausschließen.
- (3) Näheres regelt die Allgemeine Satzung des KIT zur Redlichkeit bei Prüfungen und Praktika in der jeweils gültigen Fassung.

§ 12 Mutterschutz, Elternzeit, Wahrnehmung von Familienpflichten

- (1) Auf Antrag sind die Mutterschutzfristen, wie sie im jeweils gültigen Gesetz zum Schutz der erwerbstätigen Mutter (Mutterschutzgesetz - MuSchG) festgelegt sind, entsprechend zu berücksichtigen. Dem Antrag sind die erforderlichen Nachweise beizufügen. Die Mutterschutzfristen unterbrechen jede Frist nach dieser Prüfungsordnung. Die Dauer des Mutterschutzes wird nicht in die Frist eingerechnet.
- (2) Gleichfalls sind die Fristen der Elternzeit nach Maßgabe des jeweils gültigen Gesetzes (Bundeselterngeld- und Elternzeitgesetz - BEEG) auf Antrag zu berücksichtigen. Der/die Studierende muss bis spätestens vier Wochen vor dem Zeitpunkt, von dem an die Elternzeit angetreten werden soll, dem Prüfungsausschuss, unter Beifügung der erforderlichen Nachweise schriftlich mitteilen, in welchem Zeitraum die Elternzeit in Anspruch genommen werden soll. Der Prüfungsausschuss hat zu prüfen, ob die gesetzlichen Voraussetzungen vorliegen, die bei einer Arbeitnehmerin bzw. einem Arbeitnehmer den Anspruch auf Elternzeit auslösen würden, und teilt dem/der Studierenden das Ergebnis sowie die neu festgesetzten Prüfungszeiten unverzüglich mit. Die Bearbeitungszeit der Bachelorarbeit kann nicht durch Elternzeit unterbrochen werden. Die gestellte Arbeit gilt als nicht vergeben. Nach Ablauf der Elternzeit erhält der/die Studierende ein neues Thema, das innerhalb der in § 14 festgelegten Bearbeitungszeit zu bearbeiten ist.
- (3) Der Prüfungsausschuss entscheidet auf Antrag über die flexible Handhabung von Prüfungsfristen entsprechend den Bestimmungen des Landeshochschulgesetzes, wenn Studierende Familienpflichten wahrzunehmen haben. Absatz 2 Satz 4 bis 6 gelten entsprechend.

§ 13 Studierende mit Behinderung oder chronischer Erkrankung

- (1) Bei der Gestaltung und Organisation des Studiums sowie der Prüfungen sind die Belange Studierender mit Behinderung oder chronischer Erkrankung zu berücksichtigen. Insbesondere ist Studierenden mit Behinderung oder chronischer Erkrankung bevorzugter Zugang zu teilnahmebegrenzten Lehrveranstaltungen zu gewähren und die Reihenfolge für das Absolvieren bestimmter Lehrveranstaltungen entsprechend ihrer Bedürfnisse anzupassen. Studierende sind gemäß Bundesgleichstellungsgesetz (BGG) und Sozialgesetzbuch Neentes Buch (SGB IX) behindert, wenn ihre körperliche Funktion, geistige Fähigkeit oder seelische Gesundheit mit hoher Wahrscheinlichkeit länger als sechs Monate von dem für das Lebensalter typischen Zustand abweichen und daher ihre Teilhabe am Leben in der Gesellschaft beeinträchtigt ist. Der Prüfungsausschuss entscheidet auf Antrag der/des Studierenden über das Vorliegen der Voraussetzungen nach Satz 2 und 3. Die/der Studierende hat die entsprechenden Nachweise vorzulegen.
- (2) Weisen Studierende eine Behinderung oder chronische Erkrankung nach und folgt daraus, dass sie nicht in der Lage sind, Erfolgskontrollen ganz oder teilweise in der vorgeschriebenen Zeit oder Form abzulegen, kann der Prüfungsausschuss gestatten, die Erfolgskontrollen in einem anderen Zeitraum oder einer anderen Form zu erbringen. Insbesondere ist behinderten Studierenden zu gestatten, notwendige Hilfsmittel zu benutzen.

(3) Weisen Studierende eine Behinderung oder chronische Erkrankung nach und folgt daraus, dass sie nicht in der Lage sind, die Lehrveranstaltungen regelmäßig zu besuchen oder die gemäß § 20 erforderlichen Studien- und Prüfungsleistungen zu erbringen, kann der Prüfungsausschuss auf Antrag gestatten, dass einzelne Studien- und Prüfungsleistungen nach Ablauf der in dieser Studien- und Prüfungsordnung vorgesehenen Fristen absolviert werden können.

§ 14 Modul Bachelorarbeit

(1) Voraussetzung für die Zulassung zum Modul Bachelorarbeit ist, dass die/der Studierende Modulprüfungen im Umfang von 120 LP erfolgreich abgelegt hat. Über Ausnahmen entscheidet der Prüfungsausschuss auf Antrag der/des Studierenden.

(1 a) Dem Modul Bachelorarbeit sind 15 LP zugeordnet. Es besteht aus der Bachelorarbeit und einer Präsentation. Die Präsentation soll spätestens sechs Wochen nach Abgabe der Bachelorarbeit erfolgen.

(2) Die Bachelorarbeit kann von Hochschullehrer/innen, leitenden Wissenschaftlern/Wissenschaftlerinnen gemäß § 14 Abs. 3 Ziff. 1 KITG und habilitierten Mitgliedern der KIT-Fakultät vergeben werden. Darüber hinaus kann der Prüfungsausschuss weitere Prüfende gemäß § 18 Abs. 2 und 3 zur Vergabe des Themas berechtigen. Den Studierenden ist Gelegenheit zu geben, für das Thema Vorschläge zu machen. Soll die Bachelorarbeit außerhalb der KIT-Fakultät für Maschinenbau angefertigt werden, so bedarf dies der Genehmigung durch den Prüfungsausschuss. Die Bachelorarbeit kann auch in Form einer Gruppenarbeit zugelassen werden, wenn der als Prüfungsleistung zu bewertende Beitrag der einzelnen Studierenden aufgrund objektiver Kriterien, die eine eindeutige Abgrenzung ermöglichen, deutlich unterscheidbar ist und die Anforderung nach Absatz 4 erfüllt. In Ausnahmefällen sorgt die/der Vorsitzende des Prüfungsausschusses auf Antrag der oder des Studierenden dafür, dass die/der Studierende innerhalb von vier Wochen ein Thema für die Bachelorarbeit erhält. Die Ausgabe des Themas erfolgt in diesem Fall über die/den Vorsitzende/n des Prüfungsausschusses.

(3) Thema, Aufgabenstellung und Umfang der Bachelorarbeit sind von dem Betreuer bzw. der Betreuerin so zu begrenzen, dass sie mit dem in Absatz 4 festgelegten Arbeitsaufwand bearbeitet werden kann.

(4) Die Bachelorarbeit soll zeigen, dass die Studierenden in der Lage sind, ein Problem aus ihrem Studienfach selbstständig und in begrenzter Zeit nach wissenschaftlichen Methoden zu bearbeiten. Der Umfang der Bachelorarbeit entspricht 12 Leistungspunkten. Die maximale Bearbeitungszeit beträgt drei Monate. Thema und Aufgabenstellung sind an den vorgesehenen Umfang anzupassen. Der Prüfungsausschuss legt fest, in welchen Sprachen die Bachelorarbeit geschrieben werden kann. Auf Antrag des Studierenden kann der/die Prüfende genehmigen, dass die Bachelorarbeit in einer anderen Sprache als Englisch geschrieben wird.

(5) Bei der Abgabe der Bachelorarbeit haben die Studierenden schriftlich zu versichern, dass sie die Arbeit selbstständig verfasst und keine anderen als die angegebenen Quellen und Hilfsmittel benutzt haben, die wörtlich oder inhaltlich übernommenen Stellen als solche kenntlich gemacht und die Satzung des KIT zur Sicherung guter wissenschaftlicher Praxis in der jeweils gültigen Fassung beachtet haben. Wenn diese Erklärung nicht enthalten ist, wird die Arbeit nicht angenommen. Die Erklärung kann wie folgt lauten: „Ich versichere wahrheitsgemäß, die Arbeit selbstständig verfasst, alle benutzten Hilfsmittel vollständig und genau angegeben und alles kenntlich gemacht zu haben, was aus Arbeiten anderer unverändert oder mit Abänderungen entnommen wurde sowie die Satzung des KIT zur Sicherung guter wissenschaftlicher Praxis in der jeweils gültigen Fassung beachtet zu haben.“ Bei Abgabe einer unwahren Versicherung wird die Bachelorarbeit mit „nicht ausreichend (failed)“ (5,0) bewertet.

(6) Der Zeitpunkt der Ausgabe des Themas der Bachelorarbeit ist durch die Betreuerin/ den Betreuer und die/den Studierenden festzuhalten und dies beim Prüfungsausschuss aktenkundig zu machen. Der Zeitpunkt der Abgabe der Bachelorarbeit ist durch den/die Prüfende/n beim Prüfungsausschuss aktenkundig zu machen. Das Thema kann nur einmal und nur innerhalb des ersten Monats der Bearbeitungszeit zurückgegeben werden. Macht der oder die Studierende

einen triftigen Grund geltend, kann der Prüfungsausschuss die in Absatz 4 festgelegte Bearbeitungszeit auf Antrag der oder des Studierenden um höchstens einen Monat verlängern. Wird die Bachelorarbeit nicht fristgerecht abgeliefert, gilt sie als mit „nicht ausreichend (failed)“ (5,0) bewertet, es sei denn, dass die Studierenden dieses Versäumnis nicht zu vertreten haben.

(7) Die Bachelorarbeit wird von mindestens einem/einer Hochschullehrer/in, einem/einer leitenden Wissenschaftler/in gemäß § 14 Abs. 3 Ziff. 1 KITG oder einem habilitierten Mitglied der KIT-Fakultät und einem/einer weiteren Prüfenden bewertet. In der Regel ist eine/r der Prüfenden die Person, die die Arbeit gemäß Absatz 2 vergeben hat. Bei nicht übereinstimmender Beurteilung dieser beiden Personen setzt der Prüfungsausschuss im Rahmen der Bewertung dieser beiden Personen die Note der Bachelorarbeit fest; er kann auch einen weiteren Gutachter bestellen. Die Bewertung hat innerhalb von sechs Wochen nach Abgabe der Bachelorarbeit zu erfolgen.

§ 15 Zusatzleistungen

(1) Es können auch weitere Leistungspunkte (Zusatzleistungen) im Umfang von höchstens 30 LP aus dem Gesamtangebot des KIT erworben werden. § 3 und § 4 der Prüfungsordnung bleiben davon unberührt. Diese Zusatzleistungen gehen nicht in die Festsetzung der Gesamt- und Modulnoten ein. Die bei der Festlegung der Modulnote nicht berücksichtigten LP werden als Zusatzleistungen im Transcript of Records aufgeführt und als Zusatzleistungen gekennzeichnet. Auf Antrag der/des Studierenden werden die Zusatzleistungen in das Bachelorzeugnis aufgenommen und als Zusatzleistungen gekennzeichnet. Zusatzleistungen werden mit den nach § 7 vorgesehenen Noten gelistet.

(2) Die Studierenden haben bereits bei der Anmeldung zu einer Prüfung in einem Modul diese als Zusatzleistung zu deklarieren.

§ 15 a Mastervorzug

Studierende, die im Bachelorstudium bereits mindestens 120 LP erworben haben, können zusätzlich zu den in § 15 Abs. 1 genannten Zusatzleistungen Leistungspunkte aus einem konsekutiven Masterstudiengang am KIT im Umfang von höchstens 30 LP erwerben (Mastervorzugsleistungen). § 3 und § 4 der Prüfungsordnung bleiben davon unberührt. Die Mastervorzugsleistungen gehen nicht in die Festsetzung der Gesamt-, Fach- und Modulnoten ein. Sie werden im Transcript of Records aufgeführt und als solche gekennzeichnet sowie mit den nach § 7 vorgesehenen Noten gelistet. § 15 Absatz 2 gilt entsprechend.

§ 16 Überfachliche Qualifikationen

Neben der Vermittlung von fachlichen Qualifikationen ist der Auf- und Ausbau überfachlicher Qualifikationen im Umfang von mindestens 6 LP Bestandteil eines Bachelorstudiums. Überfachliche Qualifikationen können additiv oder integrativ vermittelt werden.

§ 17 Prüfungsausschuss

(1) Für den Bachelorstudiengang wird ein Prüfungsausschuss gebildet. Er besteht aus vier stimmberechtigten Mitgliedern: zwei Hochschullehrer/innen / leitenden Wissenschaftler/innen gemäß § 14 Abs. 3 Ziff. 1 KITG / Privatdozentinnen bzw. -dozenten, zwei akademischen Mitarbeiterinnen und Mitarbeitern nach § 52 LHG / wissenschaftlichen Mitarbeiter/innen gemäß § 14 Abs. 3 Ziff. 2 KITG und einer bzw. einem Studierenden mit beratender Stimme. Die Amtszeit der nichtstudentischen Mitglieder beträgt zwei Jahre, die des studentischen Mitglieds ein Jahr.

(2) Die/der Vorsitzende, ihre/sein Stellvertreter/in, die weiteren Mitglieder des Prüfungsausschusses sowie deren Stellvertreter/innen werden von dem KIT-Fakultätsrat bestellt, die akademischen Mitarbeiter/innen nach § 52 LHG, die wissenschaftlichen Mitarbeiter gemäß § 14 Abs. 3 Ziff. 2 KITG und die Studierenden auf Vorschlag der Mitglieder der jeweiligen Gruppe; Wiederbestellung ist möglich. Die/der Vorsitzende und deren/dessen Stellvertreter/in müssen Hoch-

schullehrer/innen oder leitende Wissenschaftler/innen § 14 Abs. 3 Ziff. 1 KITG sein. Die/der Vorsitzende des Prüfungsausschusses nimmt die laufenden Geschäfte wahr und wird durch das jeweilige Prüfungssekretariat unterstützt.

(3) Der Prüfungsausschuss achtet auf die Einhaltung der Bestimmungen dieser Studien- und Prüfungsordnung und fällt die Entscheidungen in Prüfungsangelegenheiten. Er entscheidet über die Anerkennung von Studienzeiten sowie Studien- und Prüfungsleistungen und trifft die Feststellung gemäß § 19 Absatz 1 Satz 1. Er berichtet der KIT-Fakultät regelmäßig über die Entwicklung der Prüfungs- und Studienzeiten, einschließlich der Bearbeitungszeiten für die Bachelorarbeiten und die Verteilung der Modul- und Gesamtnoten. Er ist zuständig für Anregungen zur Reform der Studien- und Prüfungsordnung und zu Modulbeschreibungen. Der Prüfungsausschuss entscheidet mit der Mehrheit seiner Stimmen. Bei Stimmengleichheit entscheidet der Vorsitzende des Prüfungsausschusses.

(4) Der Prüfungsausschuss kann die Erledigung seiner Aufgaben für alle Regelfälle auf die/den Vorsitzende/n des Prüfungsausschusses übertragen. In dringenden Angelegenheiten, deren Erledigung nicht bis zu der nächsten Sitzung des Prüfungsausschusses warten kann, entscheidet die/der Vorsitzende des Prüfungsausschusses.

(5) Die Mitglieder des Prüfungsausschusses haben das Recht, der Abnahme von Prüfungen beizuwohnen. Die Mitglieder des Prüfungsausschusses, die Prüfenden und die Beisitzenden unterliegen der Verschwiegenheit. Sofern sie nicht im öffentlichen Dienst stehen, sind sie durch die/den Vorsitzende/n zur Verschwiegenheit zu verpflichten.

(6) In Angelegenheiten des Prüfungsausschusses, die eine an einer anderen KIT-Fakultät zu absolvierende Prüfungsleistung betreffen, ist auf Antrag eines Mitgliedes des Prüfungsausschusses eine fachlich zuständige und von der betroffenen KIT-Fakultät zu nennende prüfungsberechtigte Person hinzuzuziehen.

(7) Belastende Entscheidungen des Prüfungsausschusses sind schriftlich mitzuteilen. Sie sind zu begründen und mit einer Rechtsbehelfsbelehrung zu versehen. Vor einer Entscheidung ist Gelegenheit zur Äußerung zu geben. Widersprüche gegen Entscheidungen des Prüfungsausschusses sind innerhalb eines Monats nach Zugang der Entscheidung schriftlich oder zur Niederschrift bei diesem einzulegen. Über Widersprüche entscheidet das für Lehre zuständige Mitglied des Präsidiums.

§ 18 Prüfende und Beisitzende

(1) Der Prüfungsausschuss bestellt die Prüfenden. Er kann die Bestellung der/dem Vorsitzenden übertragen.

(2) Prüfende sind Hochschullehrer/innen sowie leitende Wissenschaftler/innen gemäß § 14 Abs. 3 Ziff. 1 KITG, habilitierte Mitglieder und akademische Mitarbeiter/innen gemäß § 52 LHG, welche der KIT-Fakultät angehören und denen die Prüfungsbefugnis übertragen wurde; desgleichen kann wissenschaftlichen Mitarbeitern gemäß § 14 Abs. 3 Ziff. 2 KITG die Prüfungsbefugnis übertragen werden. Bestellt werden darf nur, wer mindestens die dem jeweiligen Prüfungsgegenstand entsprechende fachwissenschaftliche Qualifikation erworben hat.

(3) Soweit Lehrveranstaltungen von anderen als den unter Absatz 2 genannten Personen durchgeführt werden, sollen diese zu Prüfenden bestellt werden, sofern die KIT-Fakultät eine Prüfungsbefugnis erteilt hat und sie die gemäß Absatz 2 Satz 2 vorausgesetzte Qualifikation nachweisen können.

(4) Die Beisitzenden werden durch die Prüfenden benannt. Zu Beisitzenden darf nur bestellt werden, wer einen akademischen Abschluss in einem mathematisch-naturwissenschaftlichen oder ingenieurwissenschaftlichen Studiengang erworben hat.

§ 19 Anerkennung von Studien- und Prüfungsleistungen, Studienzeiten

- (1) Studien- und Prüfungsleistungen sowie Studienzeiten, die in Studiengängen an staatlichen oder staatlich anerkannten Hochschulen und Berufsakademien der Bundesrepublik Deutschland oder an ausländischen staatlichen oder staatlich anerkannten Hochschulen erbracht wurden, werden auf Antrag der Studierenden anerkannt, sofern hinsichtlich der erworbenen Kompetenzen kein wesentlicher Unterschied zu den Leistungen oder Abschlüssen besteht, die ersetzt werden sollen. Dabei ist kein schematischer Vergleich, sondern eine Gesamtbetrachtung vorzunehmen. Bezüglich des Umfangs einer zur Anerkennung vorgelegten Studienleistung bzw. Prüfungsleistung (Anrechnung) werden die Grundsätze des ECTS herangezogen.
- (2) Die Studierenden haben die für die Anerkennung erforderlichen Unterlagen vorzulegen. Studierende, die neu in den Studiengang Mechanical Engineering (International) immatrikuliert wurden, haben den Antrag mit den für die Anerkennung erforderlichen Unterlagen innerhalb eines Semesters nach Immatrikulation zu stellen. Bei Unterlagen, die nicht in deutscher oder englischer Sprache vorliegen, kann eine amtlich beglaubigte Übersetzung verlangt werden. Die Beweislast dafür, dass der Antrag die Voraussetzungen für die Anerkennung nicht erfüllt, liegt beim Prüfungsausschuss.
- (3) Werden Leistungen angerechnet, die nicht am KIT erbracht wurden, werden sie im Zeugnis als „anerkannt“ ausgewiesen. Liegen Noten vor, werden die Noten, soweit die Notensysteme vergleichbar sind, übernommen und in die Berechnung der Modulnoten und der Gesamtnote einbezogen. Sind die Notensysteme nicht vergleichbar, können die Noten umgerechnet werden. Liegen keine Noten vor, wird der Vermerk „bestanden“ aufgenommen.
- (4) Bei der Anerkennung von Studien- und Prüfungsleistungen, die außerhalb der Bundesrepublik Deutschland erbracht wurden, sind die von der Kultusministerkonferenz und der Hochschulrektorenkonferenz gebilligten Äquivalenzvereinbarungen sowie Absprachen im Rahmen der Hochschulpartnerschaften zu beachten.
- (5) Außerhalb des Hochschulsystems erworbene Kenntnisse und Fähigkeiten werden angerechnet, wenn sie nach Inhalt und Niveau den Studien- und Prüfungsleistungen gleichwertig sind, die ersetzt werden sollen und die Institution, in der die Kenntnisse und Fähigkeiten erworben wurden, ein genormtes Qualitätssicherungssystem hat. Die Anrechnung kann in Teilen versagt werden, wenn mehr als 50 Prozent des Hochschulstudiums ersetzt werden soll.
- (6) Zuständig für Anerkennung und Anrechnung ist der Prüfungsausschuss. Im Rahmen der Feststellung, ob ein wesentlicher Unterschied im Sinne des Absatz 1 vorliegt, sind die zuständigen Fachvertreter/innen zu hören. Der Prüfungsausschuss entscheidet in Abhängigkeit von Art und Umfang der anzurechnenden Studien- und Prüfungsleistungen über die Einstufung in ein höheres Fachsemester.

II. Bachelorprüfung

§ 20 Umfang und Art der Bachelorprüfung

(1) Die Bachelorprüfung besteht aus den Modulprüfungen nach Absatz 2 sowie dem Modul Bachelorarbeit (§ 14).

(2) Es sind Modulprüfungen in folgenden Pflichtfächern abzulegen:

1. Fundamentals of Engineering: Modul(e) im Umfang von 143 LP,
2. Majors in Mechanical Engineering (International) : Modul(e) im Umfang von 16 LP,
3. International Project Management and Soft Skills im Umfang von 6 LP gemäß § 16.

Die Festlegung der zur Auswahl stehenden Module und deren Fachzuordnung werden im Modulhandbuch getroffen.

§ 21 Bestehen der Bachelorprüfung, Bildung der Gesamtnote

- (1) Die Bachelorprüfung ist bestanden, wenn alle in § 20 genannten Modulprüfungen mindestens mit „ausreichend (sufficient)“ bewertet wurden.
- (2) Die Gesamtnote der Bachelorprüfung errechnet sich als ein mit Leistungspunkten gewichteter Notendurchschnitt der Fachnoten sowie des Moduls Bachelorarbeit. Dabei wird die Note des Moduls Bachelorarbeit mit dem doppelten Gewicht gegenüber den Noten der übrigen Fächer berücksichtigt.
- (3) Haben Studierende die Bachelorarbeit mit der Note 1,0 und die Bachelorprüfung mit einem Durchschnitt von 1,2 oder besser abgeschlossen, so wird das Prädikat „mit Auszeichnung (with distinction)“ verliehen.

§ 22 Bachelorzeugnis, Bachelorurkunde, Diploma Supplement und Transcript of Records

- (1) Über die Bachelorprüfung werden nach Bewertung der letzten Prüfungsleistung eine Bachelorurkunde und ein Zeugnis erstellt. Die Ausfertigung von Bachelorurkunde und Zeugnis soll nicht später als drei Monate nach Ablegen der letzten Prüfungsleistung erfolgen. Bachelorurkunde und Bachelorzeugnis werden in deutscher und englischer Sprache ausgestellt. Bachelorurkunde und Zeugnis tragen das Datum der erfolgreichen Erbringung der letzten Prüfungsleistung. Diese Dokumente werden den Studierenden zusammen ausgehändigt. In der Bachelorurkunde wird die Verleihung des akademischen Bachelorgrades beurkundet. Die Bachelorurkunde wird von dem Präsidenten und der KIT-Dekanin/ dem KIT-Dekan der KIT-Fakultät unterzeichnet und mit dem Siegel des KIT versehen.
- (2) Das Zeugnis enthält die Fach- und Modulnoten sowie die den Modulen und Fächern zugeordneten Leistungspunkte und die Gesamtnote. Sofern gemäß § 7 Abs. 2 Satz 2 eine differenzierte Bewertung einzelner Prüfungsleistungen vorgenommen wurde, wird auf dem Zeugnis auch die entsprechende Dezimalnote ausgewiesen; § 7 Abs. 4 bleibt unberührt. Das Zeugnis ist von der KIT-Dekanin/ dem KIT-Dekan der KIT-Fakultät und von der/dem Vorsitzenden des Prüfungsausschusses zu unterzeichnen.
- (3) Mit dem Zeugnis erhalten die Studierenden ein Diploma Supplement in deutscher und englischer Sprache, das den Vorgaben des jeweils gültigen ECTS Users' Guide entspricht, sowie ein Transcript of Records in deutscher und englischer Sprache.
- (4) Das Transcript of Records enthält in strukturierter Form alle erbrachten Studien- und Prüfungsleistungen. Dies beinhaltet alle Fächer und Fachnoten samt den zugeordneten Leistungspunkten, die dem jeweiligen Fach zugeordneten Module mit den Modulnoten und zugeordneten Leistungspunkten sowie die den Modulen zugeordneten Erfolgskontrollen samt Noten und zugeordneten Leistungspunkten. Absatz 2 Satz 2 gilt entsprechend. Aus dem Transcript of Records soll die Zugehörigkeit von Lehrveranstaltungen zu den einzelnen Modulen deutlich erkennbar sein. Angerechnete Studien- und Prüfungsleistungen sind im Transcript of Records aufzunehmen. Alle Zusatzleistungen werden im Transcript of Records aufgeführt.
- (5) Die Bachelorurkunde, das Bachelorzeugnis und das Diploma Supplement einschließlich des Transcript of Records werden vom Studierendenservice des KIT ausgestellt.

III. Schlussbestimmungen

§ 23 Bescheinigung von Prüfungsleistungen

Haben Studierende die Bachelorprüfung endgültig nicht bestanden, wird ihnen auf Antrag und gegen Vorlage der Exmatrikulationsbescheinigung eine schriftliche Bescheinigung ausgestellt, die die erbrachten Studien- und Prüfungsleistungen und deren Noten enthält und erkennen lässt, dass die Prüfung insgesamt nicht bestanden ist. Dasselbe gilt, wenn der Prüfungsanspruch erloschen ist.

§ 24 Aberkennung des Bachelorgrades

- (1) Haben Studierende bei einer Prüfungsleistung getäuscht und wird diese Tatsache nach der Aushändigung des Zeugnisses bekannt, so können die Noten der Modulprüfungen, bei denen getäuscht wurde, berichtigt werden. Gegebenenfalls kann die Modulprüfung für „nicht ausreichend (failed)“ (5,0) und die Bachelorprüfung für „nicht bestanden (not passed)“ erklärt werden.
- (2) Waren die Voraussetzungen für die Zulassung zu einer Prüfung nicht erfüllt, ohne dass die/der Studierende darüber täuschen wollte, und wird diese Tatsache erst nach Aushändigung des Zeugnisses bekannt, wird dieser Mangel durch das Bestehen der Prüfung geheilt. Hat die/der Studierende die Zulassung vorsätzlich zu Unrecht erwirkt, so kann die Modulprüfung für „nicht ausreichend (failed)“ (5,0) und die Bachelorprüfung für „nicht bestanden (not passed)“ erklärt werden.
- (3) Vor einer Entscheidung des Prüfungsausschusses ist Gelegenheit zur Äußerung zu geben.
- (4) Das unrichtige Zeugnis ist zu entziehen und gegebenenfalls ein neues zu erteilen. Mit dem unrichtigen Zeugnis ist auch die Bachelorurkunde einzuziehen, wenn die Bachelorprüfung aufgrund einer Täuschung für „nicht bestanden (not passed)“ erklärt wurde.
- (5) Eine Entscheidung nach Absatz 1 und Absatz 2 Satz 2 ist nach einer Frist von fünf Jahren ab dem Datum des Zeugnisses ausgeschlossen.
- (6) Die Aberkennung des akademischen Grades richtet sich nach § 36 Abs. 7 LHG.

§ 25 Einsicht in die Prüfungsakten

- (1) Nach Abschluss der Bachelorprüfung wird den Studierenden auf Antrag innerhalb eines Jahres Einsicht in das Prüfungsexemplar ihrer Bachelorarbeit, die darauf bezogenen Gutachten und in die Prüfungsprotokolle gewährt.
- (2) Für die Einsichtnahme in die schriftlichen Modulprüfungen, schriftlichen Modulteilprüfungen bzw. Prüfungsprotokolle gilt eine Frist von einem Monat nach Bekanntgabe des Prüfungsergebnisses.
- (3) Der/die Prüfende bestimmt Ort und Zeit der Einsichtnahme.
- (4) Prüfungsunterlagen sind mindestens fünf Jahre aufzubewahren.

§ 26 Inkrafttreten, Übergangsvorschriften

- (1) Diese Studien- und Prüfungsordnung tritt am 01. Oktober 2017 in Kraft.

Karlsruhe, den 19. Juli 2017

Satzung zur Änderung der Studien- und Prüfungsordnung des Karlsruher Instituts für Technologie (KIT) für den Bachelorstudiengang Mechanical Engineering (International)	358
---	-----

Satzung zur Änderung der Studien- und Prüfungsordnung des Karlsruher Instituts für Technologie (KIT) für den Bachelorstudiengang Mechanical Engineering (International)

vom 28. November 2018

Aufgrund von § 10 Absatz 2 Ziff. 5 und § 20 Absatz 2 Satz 1 des Gesetzes über das Karlsruher Institut für Technologie (KIT-Gesetz - KITG) in der Fassung vom 14. Juli 2009 (GBl. S. 317 f), zuletzt geändert durch Artikel 2 des Gesetzes zur Weiterentwicklung des Hochschulrechts (HRWeitEG) vom 13. März 2018 (GBl. S. 85, 94), und § 32 Absatz 3 Satz 1 des Gesetzes über die Hochschulen in Baden-Württemberg (Landeshochschulgesetz - LHG) in der Fassung vom 1. Januar 2005 (GBl. S. 1 f), zuletzt geändert durch Artikel 1 des Gesetzes zur Weiterentwicklung des Hochschulrechts (HRWeitEG) vom 13. März 2018 (GBl. S. 85) hat der KIT-Senat am 19. November 2018 die folgende Satzung zur Änderung der Studien- und Prüfungsordnung für den Bachelorstudiengang Mechanical Engineering (International) vom 19. Juli 2017 (Amtliche Bekanntmachung des Karlsruher Instituts für Technologie (KIT) Nr. 51 vom 21. Juli 2017) beschlossen.

Der Präsident hat seine Zustimmung gemäß § 20 Absatz 2 Satz 1 KITG i.V.m. § 32 Absatz 3 Satz 1 LHG am 28. November 2018 erteilt.

Artikel 1 – Änderung der Studien- und Prüfungsordnung

1. § 9 Absatz 11 werden folgende Sätze 3 und 4 angefügt:

„Die Präsentation nach § 14 Absatz 1 a ist eine Studienleistung und kann bei einer Bewertung mit „nicht bestanden (not passed)“ (im Gegensatz zu anderen Studienleistungen) nur einmal wiederholt werden. Die Präsentation ist endgültig nicht bestanden, wenn sie zweimal mit „nicht bestanden“ (not passed) bewertet wurde.“

2. § 12 Absatz 1 wird wie folgt geändert:

a) Satz 1 wird wie folgt gefasst:

„Es gelten die Vorschriften des Gesetzes zum Schutz von Müttern bei der Arbeit, in der Ausbildung und im Studium (Mutterschutzgesetz – MuSchG) in seiner jeweils geltenden Fassung.“

b) Satz 2 wird aufgehoben.

c) Die bisherigen Sätze 3 und 4 werden die Sätze 2 und 3

3. § 14 Absatz 1a wird wie folgt geändert:

In Satz 2 wird nach dem Wort „Bachelorarbeit“ die Angabe „mit 12 LP“ und nach dem Wort „Präsentation“ die Angabe „mit 3 LP“ eingefügt.

4. § 17 Absatz 7 wird wie folgt geändert:

In Satz 4 werden nach dem Wort „Entscheidung“ die Wörter „schriftlich oder zur Niederschrift“ gestrichen.

5. § 18 Absatz 3 wird wie folgt geändert:

Nach dem Wort „sofern“ werden die Wörter „die KIT-Fakultät eine Prüfungsbefugnis erteilt hat und“ gestrichen.

Artikel 2 – Inkrafttreten

Diese Satzung tritt am Tage nach ihrer Bekanntmachung in den Amtlichen Bekanntmachungen des KIT in Kraft.

Karlsruhe, den 28. November 2018

Satzung für das hochschuleigene Auswahlverfahren im internationalen englischsprachigen Bachelorstudiengang Mechanical Engineering (International) am Karlsruher Institut für Technologie (KIT)	422
---	-----

Satzung für das hochschuleigene Auswahlverfahren im internationalen englisch-sprachigen Bachelorstudiengang Mechanical Engineering (International) am Karlsruher Institut für Technologie (KIT)

vom 19. Juli 2017

Aufgrund von § 10 Abs. 2 Ziff. 6 und § 20 des Gesetzes über das Karlsruher Institut für Technologie (KIT-Gesetz – KITG) in der Fassung vom 14. Juli 2009 (GBI. S. 317 ff.) zuletzt geändert durch Artikel 5 des Dritten Gesetzes zur Änderung hochschulrechtlicher Vorschriften (3. Hochschulrechtsänderungsgesetz – 3. HRÄG) vom 01. April 2014 (GBI. S. 99, 167), § 63 Abs. 2 Satz 1 des Gesetzes über die Hochschulen in Baden-Württemberg (Landeshochschulgesetz – LHG) in der Fassung vom 1. Januar 2005 (GBI. S. 1 ff.), zuletzt geändert durch Artikel 2 des Gesetzes zur Verwirklichung der Chancengleichheit von Frauen und Männern im öffentlichen Dienst in Baden-Württemberg und zur Änderung des Landeshochschulgesetzes vom 23. Februar 2016 (GBI. S. 108, 118), § 6 Abs. 1 und 2, §§ 6 a, 6b Hochschulzulassungsgesetz (HZG) in der Fassung vom 15. September 2005 (GBI. S. 629 ff.), zuletzt geändert durch Artikel 2 des Hochschulfinanzierungsvertrags- Begleitgesetz (HoFV-Begleitgesetz) vom 5. Mai 2015 (GBI. S. 313), in Verbindung mit § 1 Abs. 3 Satz 2, § 3 Abs. 1 Satz 3, § 10 Abs. 5 und Anlage 1 zu § 1 Abs. 3 der Hochschulvergabeverordnung (HVVO) vom 13. Januar 2003 (GBI. S. 63 ff.), zuletzt geändert durch Verordnung vom 27. Juli 2017 (GBI. S. 328), hat der Senat des Karlsruher Instituts für Technologie (KIT) am 20. März 2017 die nachstehende Satzung für das hochschuleigene Auswahlverfahren im Bachelorstudiengang Mechanical Engineering (International) am Karlsruher Institut für Technologie (KIT) beschlossen.

Das Ministerium für Wissenschaft, Forschung und Kunst hat am 20. April 2017 gem. § 6b HZG seine Zustimmung erteilt (Az.: 7831.14-21-08-4).

§ 1 Anwendungsbereich, Quoten

- (1) Das Studienangebot des englischsprachigen internationalen auslandsorientierten Bachelorstudiengangs Mechanical Engineering (International) (im Folgenden: Bachelorstudiengang Mechanical Engineering) ist in besonderer Weise auf ausländische Studienbewerber und Studienbewerberinnen ausgerichtet. Die Lehrveranstaltungen werden ganz in englischer Sprache abgehalten.
- (2) Die Ausländerquote beträgt in diesem Studiengang gem. der Anlage 1 zur Hochschulvergabeverordnung (im Folgenden: HVVO) iVm. § 1 Abs. 3 HVVO **70 vom Hundert**. Zugelassen werden in dieser Quote Studienbewerber/innen ausländischer Staatsangehörigkeit oder Staatenlose, die nicht Deutschen nach § 1 Abs. 2 HVVO gleichgestellt sind.

30 vom Hundert der zur Verfügung stehenden Plätze werden an deutsche und Deutschen gem. § 1 Abs. 2 HVVO gleichgestellte Studienbewerber/-bewerberinnen vergeben.

- (3) Sind in dem Studiengang Zulassungszahlen nach der jeweils geltenden Verordnung des Ministeriums für Wissenschaft, Forschung und Kunst über die Festsetzung von Zulassungszahlen für die Studiengänge im Vergabeverfahren der Universitäten (ZZVO) festgesetzt, vergibt das Karlsruher Institut für Technologie (im Folgenden: KIT) die zur Verfügung stehenden Studienplätze sowohl in der Ausländerquote von 70 vom Hundert als auch in der Quote für Deutsche und Deutschen Gleichgestellten von 30 vom Hundert nach dem Ergebnis eines hochschuleigenen Auswahlverfahrens gemäß dieser Satzung. Die Auswahlentscheidung wird nach dem Grad der Eignung der Bewerber/innen für den Bachelorstudiengang Mechanical Engineering und den angestrebten Beruf getroffen.

§ 2 Fristen

Eine Zulassung von Studienanfängern/-anfängerinnen erfolgt nur zum Wintersemester. Der Antrag auf Zulassung einschließlich aller erforderlichen Unterlagen muss

bis zum 30.4. eines Jahres

beim KIT eingegangen sein (**Ausschlussfrist**).

§ 3 Form des Antrags

(1) Die Form des Antrags richtet sich nach den allgemeinen für das Zulassungsverfahren geltenden Bestimmungen in der jeweils gültigen Zulassungs- und Immatrikulationsordnung des KIT.

(2) Dem Antrag sind folgende Unterlagen beizufügen:

1. eine Kopie des Zeugnisses der Allgemeinen Hochschulzugangsberechtigung, einer einschlägigen fachgebundenen Hochschulzugangsberechtigung, bzw. einer gleichwertigen n ausländischen oder sonstigen Hochschulzugangsberechtigung im Sinne des § 58 Abs. 2 LHG;
2. Nachweis über die erfolgreiche Teilnahme am SAT (Scholastic Assessment Test bestehend aus „Reading Test, Writing and Language Test, and a Math Test“) mit mindestens 1200 Punkten. Die Nachweiführung erfolgt ausschließlich über den offiziellen Leistungsnachweis mit den erreichten Punktzahlen über die Teilnahme am SAT Test (student score report „CollegeBoard SAT“) ausgestellt durch das CollegeBoard. Dieser ist der Bewerbung in Papierform beizufügen;
3. die in einem vorläufigen Zeugnis nach § 3 Abs. 3 bzw. dem Zeugnis der Hochschulzugangsberechtigung ausgewiesenen Noten in den Fächern Mathematik und Physik; alternativ kann der offizielle Leistungsnachweis mit der erreichten Punktzahl des SAT Subject Test in Physik vorgelegt werden.
4. Nachweise über ausreichende englische Sprachkenntnisse nach § 5 Abs. 1 b;
5. sofern vorhanden: Nachweise über eine abgeschlossene Berufsausbildung und Berufstätigkeit, besondere Vorbildungen, praktische Tätigkeiten, sowie außerschulische Leistungen und Qualifikationen, die über die Eignung für den Studiengang besonderen Aufschluss geben;
6. Motivationsschreiben;
7. die in der jeweils gültigen Zulassungs- und Immatrikulationsordnung genannten sonstigen Unterlagen.

Falls die vorgelegten Unterlagen und Zeugnisse nicht in deutscher oder englischer Sprache abgefasst sind, ist eine amtlich beglaubigte Übersetzung in deutscher oder englischer Sprache erforderlich. Das KIT kann verlangen, dass diese der Zulassungsentscheidung zugrundeliegenden Dokumente bei der Einschreibung im Original vorzulegen sind.

(3) Liegt das Zeugnis der Hochschulzugangsberechtigung nach Abs. 2 Ziffer 1 bis zum Ende der Antragsfrist nach § 2 noch nicht vor, kann der Zulassungsantrag auf ein vorläufiges Zeugnis gestützt werden, wenn zu erwarten ist, dass aufgrund der bisherigen Prüfungsergebnisse die Hochschulzugangsberechtigung rechtzeitig vor Beginn des Bachelorstudienfangs Mechanical Engineering erlangt wird.

Das vorläufige Zeugnis muss eine Bewertung der bisher erbrachten Prüfungsleistungen enthalten, welche in die Note der Hochschulzugangsberechtigung mit einfließen oder Voraussetzung für den Erwerb der HZB sind, und von einer für die Notengebung oder Zeugniserteilung autorisierten Stelle ausgestellt sein. Weiterhin muss der angestrebte Abschluss

im originalsprachlichen Wortlaut angegeben sein, entsprechend der Richtlinien der Zentralstelle für das ausländische (ZAB) Bildungswesen (www.anabin.org).

Bewerber und Bewerberinnen nach Satz 1 nehmen am Auswahlverfahren mit einer Durchschnittsnote, die aufgrund der bisherigen Prüfungsleistungen ermittelt wird, teil; das Ergebnis der endgültigen Hochschulzugangsberechtigung bleibt unbeachtet.

Eine Zulassung ist im Fall einer Bewerbung nach Satz 1 unter dem Vorbehalt auszusprechen, dass die Hochschulzugangsberechtigung bis zur Immatrikulation nachgewiesen wird und sich die vorläufige Zulassung durch das endgültige Zeugnis bestätigt. Im Übrigen bleibt das endgültige Zeugnis bei der Zulassung unbeachtlich. Wird der Nachweis nicht fristgerecht erbracht, erlischt die Zulassung.

§ 4 Auswahlkommission

- (1) Zur Vorbereitung der Auswahlentscheidung setzt die KIT-Fakultät Maschinenbau mindestens eine Auswahlkommission ein. Die Auswahlkommission besteht aus mindestens zwei Personen des hauptberuflich tätigen wissenschaftlichen Personals, davon ein/er Professor/in.

Ein/e Studierendenvertreter/in kann mit beratender Stimme an den Sitzungen der Auswahlkommission teilnehmen. Ein/e Vertreter/in des Carl Benz School Office kann mit beratender Stimme an den Sitzungen teilnehmen. Eines der Mitglieder der Auswahlkommission führt den Vorsitz.

- (2) Die Auswahlkommission berichtet dem KIT-Fakultätsrat nach Abschluss des Verfahrens über die gesammelten Erfahrungen und macht Vorschläge zur Verbesserung und Weiterentwicklung des Auswahlverfahrens.

§ 5 Auswahlverfahren

- (1) Am Auswahlverfahren nimmt nur teil, wer

- a) sich frist- und formgerecht um einen Studienplatz beworben hat und
- b) ausreichende englische Sprachkenntnisse (Test of English as Foreign Language (TOEFL) mit mindestens 570 Punkten im paper-based TOEFL Test, 250 Punkten im computerbased TOEFL Test oder 88 Punkten im internet-based TOEFL Test; IELTS min. 6,5 oder gleichwertiger Nachweis) nachweist, sofern die Muttersprache der Bewerberin/des Bewerbers nicht Englisch ist. Dieser Nachweis englischer Sprachkenntnisse entfällt für Bewerber/innen, deren Muttersprache Englisch ist oder die ihren Hochschulabschluss in einem englischsprachigen Studiengang oder im englischsprachigen Ausland erworben haben. Die offizielle Sprache des Studienprogramms muss auf dem Abschlusszeugnis, dessen Ergänzung, im Transcript of Records oder in einer entsprechenden Bescheinigung der Hochschule vermerkt sein.

- (2) Die Zulassung ist zu versagen, wenn

- a) die Unterlagen nach § 3 Abs. 2 nicht frist- oder formgerecht vorgelegt wurden oder
- b) im Bachelorstudiengang Mechanical Engineering oder einem verwandten Studiengang mit im Wesentlichen gleichem Inhalt eine nach der Prüfungsordnung erforderliche Prüfung endgültig nicht bestanden wurde oder der Prüfungsanspruch aus sonstigen Gründen nicht mehr besteht (§ 60 Abs. 2 Nr. 2 LHG, § 9 Abs. 2 HZG). Über die Festlegung der Studiengänge mit im Wesentlichen gleichem Inhalt entscheidet die Auswahlkommission des Bachelorstudiengangs Mechanical Engineering im Einvernehmen mit dem Prüfungsausschuss des Bachelorstudiengangs Mechanical Engineering.

- (3) Im Übrigen bleiben die allgemeinen für das Zulassungsverfahren geltenden Bestimmungen der Zulassungs- und Immatrikulationsordnung des KIT unberührt.

§ 6 Auswahlkriterien

Die Auswahl erfolgt aufgrund einer gemäß § 8 zu bildenden Rangliste nach dem Ergebnis

- a) eines fachspezifischen Studierfähigkeitstests (§ 7),
- b) die in den (vorläufigen) Zeugnissen ausgewiesenen Profilnoten in Mathematik und Physik aus den letzten zwei Halbjahren vor dem 30.04., sofern diese in die Note der Hochschulzugangsberechtigung mit einfließen oder Voraussetzung für den Erwerb der Hochschulzugangsberechtigung sind. Die Profilnoten können ersetzt werden durch den SAT-Subject Test Physik.
- c) eines Motivationsschreibens,
- d) beruflicher und sonstiger Leistungen.

§ 7 Fachspezifischer Studierfähigkeitstest (SAT-Test)

Zur Feststellung der fachspezifischen Studierfähigkeit des Bewerbers / der Bewerberin für den Bachelorstudiengang Mechanical Engineering werden ausschließlich die Ergebnisse des SAT-Tests (bestehend aus den drei Teilen „Reading Test, Writing and Language Test and Math Test) herangezogen. Der SAT-Test dient der Überprüfung der zur Erfüllung der fachspezifischen Anforderungen des Bachelorstudiengangs Mechanical Engineering notwendigen Fachkenntnisse und Fähigkeiten des Bewerbers/ der Bewerberin, die im Nachweis der schulischen Leistungen nicht oder nur unzureichend abgebildet sind. Für das Bestehen des fachspezifischen Studierfähigkeitstests müssen im SAT-Test mindestens 1200 Punkte erreicht worden sein.

§ 8 Erstellen der Rangliste für die Auswahlentscheidung

- (1) Die Rangliste wird nach einer Punktzahl, in die nachfolgende Leistungen eingehen, erstellt:

1. Ergebnis des SAT-Test:

Die im SAT-Test erreichte Punktzahl wird mit maximal 20 Punkten bewertet. Die Umrechnung erfolgt nach der Tabelle in Anlage 1 der Satzung.

2. Die in den (vorläufigen) Zeugnissen ausgewiesenen Profilnoten in Mathematik und Physik aus den letzten zwei Halbjahren vor dem 30.04., sofern diese in die Note der Hochschulzugangsberechtigung mit einfließen oder Voraussetzung für den Erwerb der Hochschulzugangsberechtigung sind. Die Profilnoten können ersetzt werden durch das Ergebnis des SAT-Subject Test Physik:

Die in den (vorläufigen) Zeugnissen ausgewiesenen Profilnoten in Mathematik und Physik bzw. das Ergebnis des SAT Subject Test Physik werden mit maximal 10 Punkten bewertet. Ausländische Schulnoten werden entsprechend der Bayrischen Formel in deutsche Noten umgerechnet. Aus den (umgerechneten) Schulnoten in Mathematik und Physik wird das arithmetische Mittel gebildet.

Die Verteilung der maximal 10 Punkte auf das aus den Schulnoten gebildete arithmetische Mittel bzw. das Ergebnis des SAT Subject Test Physik erfolgt gemäß den Tabellen in den Anlagen 2 (Profilnoten) und Anlage 3 (SAT Subject Test) der Satzung.

3. Motivationsschreiben:

Im Motivationsschreiben soll der Bewerber/ die Bewerberin zu folgenden Themen Stellung beziehen bzw. Angaben machen:

Darstellung der

- a) eigenen Persönlichkeit und des Werdegangs
- b) fachspezifischen Interessen und Fähigkeiten
- c) Entscheidung für die Studienrichtung Maschinenbau
- d) Persönliche Ziele für den Studienabschluss Bachelor of Science
- e) Spätere Studien- und Berufsziele.

Das Motivationsschreiben ist in englischer Sprache zu verfassen und soll einen Umfang von zwei DIN A4 Seiten nicht überschreiten.

Die Mitglieder der Auswahlkommission bewerten das Motivationsschreiben gemeinsam auf einer Skala von 0 bis 10. Dabei werden die Themen nach Nr. 3 a) bis e) mit jeweils maximal 2 Punkten bewertet, sofern sie über die Eignung des Bewerbers/ der Bewerberin für das angestrebte Studium besonderen Aufschluss geben.

4. Berufliche und sonstige Leistungen:

Die Mitglieder der Auswahlkommission bewerten die beruflichen und sonstigen Leistungen gesondert auf einer Skala von 0 bis 5. Dabei werden die folgenden Kriterien berücksichtigt, sofern sie über die Eignung für das angestrebte Studium besonderen Aufschluss geben:

- a) eine abgeschlossene Berufsausbildung in einem einschlägigen Ausbildungsberuf und bisherige, für den Studiengang einschlägige Berufsausübung auch ohne abgeschlossene Berufsausbildung,
- b) praktische Tätigkeiten und besondere Vorbildungen
- c) außerschulische Leistungen und Qualifikationen (z.B. Preise und Auszeichnungen).

Aus der Summe der von den einzelnen Mitgliedern vergebenen Punktzahlen wird das arithmetische Mittel bis auf eine Dezimalstelle hinter dem Komma berechnet. Es wird nicht gerundet.

- (2) Die Punktzahl nach Absatz 1 Nr. 1 (SAT-Test), nach Absatz 1 Nr. 2 (Profilnoten bzw. Ergebnis des SAT Subject Test Physik), nach Absatz 1 Nr. 3 (Motivationsschreiben) und Absatz 1 Nr. 4 (Berufliche und sonstige Leistungen) werden addiert (max. 45 Punkte). Auf der Grundlage der so ermittelten Punktzahl wird unter allen Teilnehmenden des Auswahlverfahrens eine Rangliste erstellt.
- (3) Bei Ranggleichheit gilt § 16 HVVO.

§ 9 Inkrafttreten

Diese Satzung tritt am Tage nach ihrer Bekanntmachung in den Amtlichen Bekanntmachungen des KIT in Kraft. Sie gilt erstmals für das Bewerbungsverfahren zum Wintersemester 2017/2018.

Karlsruhe, den 19. Juli 2017

*Prof. Dr.-Ing. Holger Hanselka

1 Curriculum, Modules and Examinations

The credit points (CP) are awarded in accordance with the „European Credit Transfer and Accumulation System“ (ECTS) and are based on the workload to be completed by students.

1.1 Examination Modalities

In each semester at least one examination date is offered for written examinations and at least two dates for oral examinations. Examination dates and deadlines for examination registration are determined by the examination board. Registration for the exams usually takes place at least one week before the exam. Enrolment and examination dates will be announced in due time, in the case of written examinations at least 6 weeks before the examination.

The examiner decides which aids may be used in an examination. A list of the approved aids will be published together with the examination date.

The following rules apply to performance reviews in the major subject modules:
The concrete form of the examinations is laid down in the Study and Examination Regulations § 6 paragraph 3.

It is possible to take the mandatory examinations in the SP's separately. The mandatory examination mark is based as the average value of the components/partial performance weighted by the credit points. Changing the component/partial performance of the mandatory subject is no longer possible after the component/partial performance examinations have started. It is recommended to take the mandatory examinations temporally close together.

In the case of major subject oral examinations, the duration of the examination should be 5 minutes per credit point. If an oral examination for a specific subject awards more than 12 CP, the duration of the examination should be 60 minutes.

1.2 Bachelor Course Modules

The module handbook indicates whether pre-requisites in the form of course achievements are required for module examinations or module component/partial performance examinations. The duration of written exams is specified in hours. Examination results are included in the module mark or the overall mark with the specified weight (W).

Curriculum of the KIT-Faculty of Mechanical Engineering for the Bachelor's Program Mechanical Engineering (International). Valid from April 1, 2024, on resolution of the Faculty Council on July 20, 2016, last edited January 18, 2024. For legally binding information please refer to the German version.

1.4 Bachelor Thesis

The performance and marking of the bachelor thesis is regulated in § 14 of the study and examination regulations for the bachelor's degree course Mechanical Engineering (International). Further information about module description can be found in the module handbook.

2 Major Subjects/Specialization Subjects

Major subjects approved by the faculty council are listed in the module handbook.

2.1 Major/Specialization Subject Options

For the major subject, components amounting to 16 CP are chosen, of which at least 8 CP are acquired from mandatory courses (CA). The remaining 8 credit points can come from the elective courses (CE). In the context of internships, a maximum of 4 CPs may be earned as study achievements if this is an option of a major subject.

Completion of the major subject module with more than 16 LP is only permitted if the addition of the credit points of the selected sub-module examinations within the major subject module does not add up to 16 CP. Participation in further sub-module examinations is not permitted if 16 CP have already been achieved or exceeded.

The main subject mark is based on the component module exams completed with a mark. All component module marks are weighted according to their credit points. When forming the overall mark, the major subject is evaluated with 16 CP. The description of major subjects with regard to content and qualification goals as well as the components contained therein can be found in the current module handbook of the Bachelor's program.

Competence Certificate

Three written exams for the parts I-III of length 120 minutes each.

Prerequisites

None.

Competence Goal

The students know the foundations of calculus of one and several variables, linear algebra, theory of differential equations, and probability theory. They know and can apply techniques in these fields.

Content

Basic set theoretic notions, proofs, sequences and convergence, functions and continuity, series, derivatives, integrals, vector spaces, matrices, Laplace transform, functions of several variables, applications of multivariate calculus, Fourier analysis, differential equations, probability.

Module grade calculation

The grade for the module is composed from equally weighted grades for the examinations in Advanced Mathematics I-III.

Workload

In class: 270 hours

- lectures, tutorials and examinations

Independent study: 360 hours

- independent review of course material
- work on homework assignments
- preparation for written exams

Literature

- Lecture notes
- K. F. Riley, M. P. Hobson, S. J. Bence "Mathematical methods for physics and engineering", Cambridge University Press, 2015

M**9.2 Module: Bachelor's Thesis [M-MACH-103722]**

Responsible: Prof. Dr.-Ing. Martin Heilmaier
Organisation: KIT Department of Mechanical Engineering

Part of: Bachelor's Thesis

Credits 15	Grading scale Grade to a tenth	Recurrence Each term	Duration 1 term	Language English	Level 3	Version 1
---------------	-----------------------------------	-------------------------	--------------------	---------------------	------------	--------------

Mandatory						
T-MACH-108685	Bachelor's Thesis				12 CR	Heilmaier
T-MACH-108684	Presentation				3 CR	Heilmaier

Competence Certificate

The module Bachelor Thesis consists of a written bachelor thesis and an oral presentation of a scientific subject chosen by the student himself/herself or given by the supervisor. The bachelor's thesis is designed to show that the student is able to deal with a problem of his/her subject area in an independent manner and within the given period of time using scientific methods.

The work load of the bachelor thesis corresponds to 12 ECTS. The maximal processing time of the bachelor thesis takes three months.

The date of issue of the subject has to be fixed by the supervisor and the student and to be put on record at the examination board. The subject of the bachelor thesis may be only returned once and only within the first month of processing time

On a reasoned request of the student, the examination board can extend the processing time by up to one month. If the bachelor thesis is not completed in time, this examination is "failed" (5,0), unless the student is not responsible.

The bachelor thesis is to be evaluated by not less than a professor or a senior scientist according to § 14 Abs. 3 Ziff. 1 KITG and another examiner. Generally, one of the two examiners is the person who has assigned the thesis. If the examiners do not agree, the bachelor thesis is graded by the examination board within this assessment; another expert can be appointed too. The bachelor thesis has to be graded within a period of six weeks after the submission.

The colloquium presentation must be held within 6 weeks after the submission of the bachelor thesis. The presentation should last around 20 minutes, corresponds to 3 ECTS, and is followed by a scientific discussion with the present expert audience.

Prerequisites

The requirement for admission to the bachelor thesis module are 120 ECTS. As to exceptions, the examination board decides on a request of the student (see § 14 (1) SPO).

Modeled Conditions

The following conditions have to be fulfilled:

1. You need to have earned at least 120 credits in the following fields:
 - Fundamentals of Engineering
 - International Project Management and Soft Skills
 - Majors in Mechanical Engineering (International)

Competence Goal

The student is able to work independently on a defined, subject-relevant theme based on scientific criteria within a given period of time. The student is able to do research, to analyze information, to abstract as well as collect and recognize basic principles and regularities on the basis of less structured information. He/she overviews a question, is able to choose scientific methods and techniques, and use them to solve the question or to identify other potentials. In general, this will be carried out in consideration of social and/or ethical aspects.

The student can interpret, evaluate, and if needed plot the results obtained. He/she is able to clearly structure a scientific work and (a) to communicate it in written form using technical terminology as well as (b) to present it in oral form and discuss it with experts.

Content

The student shall be allowed to make suggestions for the topic of his/her bachelor thesis. The topic is set by the supervisor of the thesis in accordance with § 14 (3) SPO.

Workload

The workload for the preparation and presentation of the bachelor thesis is about 450 hours.

M**9.3 Module: Computer Science (BSc-Modul 09, Inf) [M-MACH-102563]**

Responsible: Prof. Dr.-Ing. Jivka Ovtcharova
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 6	Grading scale Grade to a tenth	Recurrence Each summer term	Duration 1 term	Language German/English	Level 3	Version 2
--------------	-----------------------------------	--------------------------------	--------------------	----------------------------	------------	--------------

Mandatory			
T-MACH-105205	Computer Science for Engineers	6 CR	Ovtcharova
T-MACH-105206	Computer Science for Engineers, Prerequisite <i>This item will not influence the grade calculation of this parent.</i>	0 CR	Ovtcharova

Competence Certificate

Written examination "Computer Science for Engineers", 100%, 180 minutes; Examination prerequisite: passed lap course.

Prerequisites

None

Competence Goal

Students can identify and explain fundamental terms, problems and concepts of computer science. They can apply the basic methods of the OO modeling with UML and implement the object-oriented programming (OOP) with the programming language JAVA.

Content

Basics: Information representation- and processing, terms and definitions: alphabet, data, signals, information, numeral systems, propositional logic and Boolean algebra, computer architectures, programming paradigms.
Object Orientation: Definition and important characteristics of object orientation, Object-oriented modeling with UML.
Data Structures: Definition, properties and application of graphs, trees, linked lists, queues and stacks.
Algorithms: Characteristics of algorithms, complexity analysis, design methods, important examples.
Database management systems: Relational data model, relational algebra, declarative language SQL. Basics and concepts of JAVA. Introduction to programming using JAVA.

Module grade calculation

Examination result "Computer Science for Engineers" 100%

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

Attendance time: 63 hours

Self-study: 117 hours

Learning type

Lecture and Lab Course

M**9.4 Module: Electrical Engineering [M-ETIT-104049]**

Responsible: Prof. Dr. Martin Doppelbauer
Organisation: KIT Department of Electrical Engineering and Information Technology
Part of: Fundamentals of Engineering

Credits 8	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 1 term	Language English	Level 3	Version 1
--------------	-----------------------------------	--------------------------------	--------------------	---------------------	------------	--------------

Mandatory						
T-ETIT-108386	Electrical Engineering and Electronics			8 CR	De Carne	

Competence Certificate

The control of success takes place by a written examination, duration 3 hours.

By successfully completing two additional exercise sheets (on a voluntary basis), a bonus of up to 6 exam points can be earned (corresponds to a maximum grade improvement of the written exam by the value 0.3 or 0.4).

Prerequisites

none

Competence Goal

After successful attendance of the course, students will be able to apply the electrical engineering fundamentals relevant for mechanical engineers (electric field, magnetic field, resistance, capacitor, coil) to practical issues.

Students will be able to analyze DC and AC electrical circuits using various methods of network analysis.

Furthermore, the students can explain (the natural) points of contact between electrical engineering and mechanical engineering: They can describe the structure and function of the most important electrical machines (transformer, DC, asynchronous and synchronous machine) and are able to perform simple designs and calculations for the stationary operation of machines.

Furthermore, the students can name the most important semiconductor components and describe their physical function.

In addition, students have learned the most important basic power electronic circuits for semiconductor switches that can and cannot be switched off and can also understand more complex circuits derived from them.

Likewise, students can explain and calculate operational amplifier circuits by applying the methods of power system analysis learned at the beginning of the course and transferring them to the study of operational amplifier circuits.

Content

To motivate students, examples are used at the beginning of the lecture to illustrate the constantly increasing importance of electrical energy and electrically operated devices, in order to make it clear that a student of mechanical engineering will also be increasingly confronted with electrical issues in the future.

After the introduction and definition of physical units and basic terms, the electrical components resistor, capacitor and inductor as well as voltage and current sources are dealt with in detail. Capacitors and inductors are derived from the properties of electric and magnetic fields.

With respect to the abrupt switching on or off of voltages on networks, RC and RL circuits are considered, i.e. systems whose time behavior is described with 1st order differential equations.

The chapter AC current deals after the explanation of important characteristics with the time relations between current and voltage for the above mentioned components and in particular with the method of the "complex AC current calculation". The latter allows the simplification of differential equation systems to complex algebraic equation systems for the important special case of sinusoidal curves in steady-state operation. For the graphical representation of the conditions in an equivalent circuit, pointer diagrams are introduced and their application for circuit description is explained.

Starting with the DC machine, the transformer, asynchronous machine and synchronous machines are explained in detail in terms of their structure, characteristic behavior, application purposes and the descriptive equations and diagrams. The chapter on drive technology uses examples to illustrate general aspects of electrical drives.

In the section on semiconductor components, the PN junction with the simplest associated component, the diode, and other components based on semiconductors (without PN junction) are explained in particular, in addition to their manufacture.

By increasing the complexity of the components (at least 2 PN junctions), bipolar transistors, field-effect transistors, thyristors, IGBTs, IGCTs and other semiconductor switches used in power converters are successively introduced and explained in terms of structure, function and purpose.

Power converter circuits are created by interconnecting several semiconductor valves in a suitable manner. AC and three-phase bridges built with diodes and thyristors are described as the most important representatives of line-commutated circuits.

DC-DC converters (buck or boost converters) built with disconnectable switches are explained as well as the construction and control of self-controlled three-phase bridges for the realization of converters for the supply of three-phase machines.

As a link between the output voltages of analog sensors and the AD converters at the input of digital signal processing systems, operational amplifier circuits are typically used for signal preconditioning (e.g. signal amplification for thermocouples or signal attenuation for voltage measurements). The most important circuit variants and the calculation of the circuit elements are presented.

Module grade calculation

The module grade is the grade of the written exam.

Annotation

Exam and Lecture will be held in English.

By successfully completing two additional exercise sheets (on a voluntary basis), a bonus of up to 6 exam points can be earned (corresponds to a maximum grade improvement of the written exam by the value 0.3 or 0.4).

Workload

1. attendance in lectures and exercises: 31 lectures and 14 exercises each 1,5h = 67,5h
2. follow-up on lectures: $31 * 1h = 31h$
3. preparation of exercises $14 * 2h = 28h$
4. preparation of additional exercises $2 * 5h = 10h$
5. preparation of examination: 80h
6. Examination time: 3h

A total of 220h = 8 Credit points

Recommendation

Knowledge of mathematics known in the 3rd semester as well as middle school physics.

Learning type

The lecture is structured in such a way that physical phenomena and relationships (possibly not yet known from school lessons) are derived in an explanatory manner. This means that even those students who did not take physics in high school will be able to follow the lecture, provided that they are present at the lecture and the exercises and, if necessary, do some work at home.

M**9.5 Module: Engineering Mechanics (BSc-Modul 03, TM) [M-MACH-102572]**

Responsible: Prof. Dr.-Ing. Thomas Böhlke
Organisation: KIT Department of Mechanical Engineering

Competence Certificate

Engineering Mechanics I (T-MACH-100282): written exam, 90 minutes, graded. Additives as announced

Engineering Mechanics II (T-MACH-100283): written exam, 90 minutes, graded. Additives as announced

Engineering Mechanics III/IV (T-MACH-105201): written exam, 180 minutes, graded. Additives as announced

Coursework in *Tutorial Engineering Mechanics I* (T-MACH-100528) must be passed for admission to the exam Engineering Mechanics I.

Coursework in *Tutorial Engineering Mechanics II* (T-MACH-100284) must be passed for admission to the exam Engineering Mechanics II.

Coursework in *Tutorial Engineering Mechanics III* (T-MACH-105202) and Coursework in *Tutorial Engineering Mechanics IV* (T-MACH-105203) must be passed for admission to the exam Engineering Mechanics III/IV.

Prerequisites

None

Competence Goal

After completion of this module, the students can

- compute and evaluate 3D stress and strain states within the framework of linear elasticity and thermoelasticity
- apply the principle of virtual displacements
- apply energy methods and evaluate approximate solutions
- evaluate the stability of equilibrium positions
- solve worksheet problems to topics of the lecture using the computer algebra system MAPLE

In EM III and EM IV the students learn to analyse the motion of points and systems. Based on the axioms of Newton and Euler they know how to derive equations of motion. Besides the synthetic methods they get familiar with analytical methods which are based on energy expressions and can be applied efficiently and formalised. These methods are introduced in the scope of systems of mechanical engineering so that students can determine and analyse motions and the forces which are generated by these motions.

Content

This Module consists of the courses "Engineering Mechanics I (lecture)" up to "Engineering Mechanics IV (lecture)" as well as "Engineering Mechanics I (Tutorial)" up to "Engineering Mechanics IV (Tutorial)"

Contents of "Engineering Mechanics I": basics of vector calculus; force systems; statics of rigid bodies; internal forces and moments in bars and beams; friction; centre of gravity, centre of mass; work, energy, principle of virtual work; statics of inextensible ropes; elastostatics of tension-compression-bars

Contents of "Engineering Mechanics II": bending; shear; torsion; stress and strain state in 3D; Hooke's law in 3D; elasticity theories in 3D; energy methods in elastostatics; approximation methods; stability

Contents of "Engineering Mechanics III":

Kinematics: Cartesian, cylindrical and natural coordinates. Time derivatives in moving reference frames, angular velocities of reference frames.

Kinetics of a particle:

Newton's axiom, Principle of d'Alembert, work of a force, kinetic and potential energies, principle of linear momentum, principle of moment of momentum, kinetics in moving reference systems

Systems of particles:

Principle of center of mass, Principle of moment of momentum, impacts between particles, systems with variable mass, applications.

Plain motion of rigid bodies:

Pure translation, pure rotation, general plain motion. Instantaneous center of rotation, Kinetics, moment of momentum, principle of work and principle of energy conservation for a rotation around a space-fixed axis. Mass moment of inertia, parallel-axis-theorem. Principle of linear momentum and principle of moment of momentum for arbitrary plain motion. Principle of d'Alembert for plain motion. Principles of linear and moment of momentum in integral form. Applications for impact problems.

Contents of "Engineering Mechanics IV":

Spatial kinematics of a rigid body, Euler angles, angular velocity using Euler angles, Euler's equations, inertia tensor, kinetic energy of a rigid body, free gyroscopes, forced gyroscopes, systems of rigid bodies, principle of d'Alembert, Lagrange's equations of the first and second kind, generalized coordinates, free and forced vibration of one degree of freedom systems, frequency response, vibration of multi degree of freedom systems, vibration absorption

Module grade calculation

The final grade of this module is computed as CP-based weighted sum of the included exams.

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

lectures and exercises: 204h

homework and preparation of examination: 486h

Learning type

Lectures, Tutorials, Lab course groups, attestation of solved work sheets, colloquia, consultation hours

M**9.6 Module: Fluid Mechanics (BSc-Modul 12, SL) [M-MACH-102565]**

Responsible: Prof. Dr.-Ing. Bettina Frohnäpfel
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 8	Grading scale Grade to a tenth	Recurrence Each summer term	Duration 2 terms	Language German/English	Level 3	Version 1
--------------	-----------------------------------	--------------------------------	---------------------	----------------------------	------------	--------------

Mandatory	
T-MACH-105207	Fluid Mechanics 1&2

Competence Certificate

Common examination of "Fluid Mechanics I" and "Fluid Mechanics II"; written exam, 3 hours (graded)

Prerequisites

none

Competence Goal

After having completed this module the student is capable of deriving the mathematical equations that describe the motion of fluids and can determine flow quantities for generic problems. He/she can name characteristic properties of fluids and distinguish different flow states. The student is capable of determining fluid quantities in fundamental applications. This includes the calculation of

- static and dynamic forces acting from the fluid onto the solid
- two-dimensional viscous flows
- one-dimensional incompressible and compressible flows without losses
- lossy flows through pipes

Content

properties of fluids, surface tension, hydro- and aerostatics, kinematics, stream tube theory (compressible and incompressible), losses in pipeline systems, dimensional analysis, dimensionless numbers

tensor notation, fluid elements in continuum, Reynolds transport theorem, conservation of mass and momentum, continuity equation, constitutive law for Newtonian fluids, Navier-Stokes equations, angular momentum and energy conservation, integral form of the conservation equations, forces between fluids and solids, analytical solutions of the Navier-Stokes equations

Module grade calculation

Election notes

Interdisciplinary qualifications (IQ) completed at the Sprachenzentrum (SpZ) or Studienkolleg (StK) can be assigned in Self-Service. First select a self-service partial achievement in your study schedule and then assign an IQ achievement via the "IQ achievements" tab.

Mandatory			
T-MACH-105296	Working Methods in Mechanical Engineering	4 CR	Deml
Soft Skills (Election: at least 2 credits)			
T-ZAK-112807	Civil Society and non-profit Organizations in democratic societies	2 CR	
T-ZAK-112565	Deconstructing Unconscious Bias into Intercultural Competence: A neurological look into how the brain constructs reality	2 CR	
T-MACH-106700	Do it! – Service-Learning for Prospective Mechanical Engineers	2 CR	Deml
T-ZAK-112570	Environmentally Induced Migrants (EIMs)	2 CR	
T-ZAK-112564	Intercultural Communications: USA and Germany	2 CR	
T-MACH-110961	Steering of a Global Operating Company - The Robert BOSCH GmbH as an Example	2 CR	Grube
T-ZAK-113411	The impact of sustainable steering: Insights for holistic decision-making	2 CR	
T-MACH-112568	Self-Booking-BSc-SPZ-Non-Graded	2 CR	Heilmair
T-MACH-112569	Self-Booking-BSc-SPZ-Graded	2 CR	Heilmair
T-MACH-112680	Self-Booking-BSc-StK-Non-Graded	2 CR	Heilmair
T-MACH-112681	Self-Booking-BSc-StK-Graded	2 CR	Heilmair

Competence Certificate

Success is monitored within the framework of academic achievements.

Prerequisites

None

Competence Goal

After completing the module International Project Management and Interdisciplinary Qualifications, students will be able to

- build up and expand basic cognitive, communicative and social skills (thinking in contexts, logical and abstract thinking, transfer skills, problem-solving skills, written and oral expression skills, presentation techniques, conflict skills, teamwork skills, leadership skills, etc.),
- apply practice-relevant techniques and skills (basic economic knowledge, foreign languages, project management),
- build up and apply orientation knowledge (general education enabling interdisciplinary thinking and thinking in contexts, epistemological and ethical-practical reflection of the knowledge taught in the subjects),
- apply principles to ensure good scientific practice.

Content

Working Methods in Mechanical Engineering:

1. Time and self management
2. Teamwork
3. Literature research
4. Scientific Writing
5. Scientific Presentation

In addition to Working Methods in Mechanical Engineering, the module "International Project Management and Interdisciplinary Qualifications" consists of a freely selectable course of the compulsory elective block. The content of the courses is mentioned in each brick.

Workload

The total workload for this module is approximately 180 hours. The total workload per course is obtained from the workload contributing to lecture and exercise attendance, exam hours, and the required time which it takes for an average student with average capacities to achieve the specified learning targets of this module. One SWS corresponds to 15 hours of presence time. The remaining workload is comprised of self-study.

Learning type

The learning types depend on the courses selected. They can consist of lectures, seminars, exercises or practicals.

Literature

The script and references are available for download on ILIAS.

M**9.8 Module: Machines and Processes (mach13BSc-Modul 13, MuP) [M-MACH-102566]**

Responsible: Dr.-Ing. Heiko Kubach

Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 7	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 1 term	Language German/English	Level 3	Version 3
--------------	-----------------------------------	--------------------------------	--------------------	----------------------------	------------	--------------

Mandatory						
T-MACH-105208	Machines and Processes		7 CR	Bauer, Kubach, Maas, Pritz		
T-MACH-105232	Machines and Processes, Prerequisite <i>This item will not influence the grade calculation of this parent.</i>		0 CR	Bauer, Kubach, Maas, Pritz		

Competence Certificate

written exam (2 h)

Prerequisites

None.

Competence Goal

The students can name and describe basic energy conversion processes and energy converting machines. They can explain the application of these energy conversion processes in various machines. They can analyze and evaluate the processes and machines in terms of functionality and efficiency and they are able to solve basic technical problems in terms of operating the machines.

Content

- Introduction to power engineering
- Radial and axial turbines
- Pumps
- Compressors
- Blowers
- Wind turbines
- Fuel cells
- Energy storage
- E-motors
- Heat pumps
- Combined heat and power
- Diesel engines
- Gasoline engines
- Hydrogen engines

Module grade calculation

Grade out of written exam (100%)

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

regular attendance: 48 h

self-study: 162 h

Learning type

Lecture+Tutorial

Lab Course

M**9.9 Module: Manufacturing Processes (MEI) [M-MACH-104232]**

Responsible: Prof. Dr.-Ing. Volker Schulze
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 4	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 1 term	Language English	Level 3	Version 1
--------------	-----------------------------------	--------------------------------	--------------------	---------------------	------------	--------------

Mandatory	
T-MACH-108747	Basics of Manufacturing Technology (MEI)

Competence Certificate
written exam (duration: 60 min)

Prerequisites

none

Competence Goal

The students ...

- are able to classify the manufacturing processes by their general functionality according to the specific main groups (DIN 8580).
- have the ability to declare and explain the function of the significant manufacturing processes of the main groups (DIN 8580).
- are enabled to describe the characteristic process features (geometry, materials, accuracy, tools, machines) of the significant manufacturing processes of the main groups (DIN 8580).
- have the ability to derive the relevant process specific technical advantages and disadvantages of the characteristic process features.
- are enabled to perform a selection of suitable manufacturing processes for given components.
- are enabled to classify the required manufacturing processes in the expiry of a process chain for the production of given sample products.

Content

The objective of the lecture is to classify the manufacturing technology within the wider context of production engineering, to provide an overview of the different manufacturing processes and to establish basic process knowledge of the common processes. The lecture conveys the basic principles of manufacturing technology and deals with the manufacturing processes based on example components according to their classification into main groups regarding technical and economic aspects.

The following topics will be covered:

- Primary processing (casting, plastics engineering, sintering, additive manufacturing processes)
- Forming (sheet-metal forming, massive forming)
- Cutting (machining with geometrically defined and geometrically undefined cutting edges, separating, abrading)
- Joining
- Coating
- Heat treatment and surface treatment

Workload

regular attendance: 21 hours
self-study: 99 hours

Learning type

Lecture

M**9.10 Module: Materials Science (BSc-Modul 04, WK) [M-MACH-102562]**

Responsible: Prof. Dr.-Ing. Martin Heilmaier
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 14	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 2 terms	Language German/English	Level 3	Version 3
---------------	-----------------------------------	--------------------------------	---------------------	----------------------------	------------	--------------

Mandatory						
T-MACH-105145	Materials Science I & II		11 CR	Gibmeier, Heilmaier, Pundt		
T-MACH-105146	Materials Science Lab Course		3 CR	Gibmeier, Heilmaier, Pundt		

Competence Certificate

not graded: participation in 10 lab experiments, introductory colloquia must be passed and 1 short presentation must be presented. The lab course must be finished successfully prior to the registration for the oral exam;

graded: oral exam covering the whole module, about 25 minutes.

Prerequisites

none

Competence Goal

Within this Module the students should

- gain knowledge of basics about structural and functional materials
- be able to draw relationships between atomic structure, microstructure and properties
- be able to apply appropriate methods to determine mechanical and other relevant properties as well as to characterize the microstructure of materials
- be able to assess material properties and corresponding applications

Content

WK I

Structure of atoms and atomic bonding

Crystalline solids

Defects in crystalline solids

Amorphous and partially crystalline solids

Constitution of alloys and materials

Diffusion and phase transformation in the solid state

Microscopic characterization method

Characterization with X-Rays and neutrons

Non-destructive Testing

Mechanical Testing

WK II

Iron based alloys

Non-iron based alloys

Ceramics

Glasses

Polymers

Composite Materials

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

The work load of the module is about 420 hours.

The workload for the lab course Materials Science is 90 h in total and consists of the presence during the 10 experiments (one week half-time, 4 hours per day) as well as preparation and rework time at home.

The workload for the lecture Materials Science I & II is 165 h per semester and consists of the presence during the lectures (WS: 4 SWS, SS: 2SWS) and the exercises (1 SWS per WS and 1 SWS per SS) as well as preparation and rework time at home.

Learning type

The module "Materials Science" consists of the lectures "Materials Science I and II" with additional tutorials for small groups and a one week materials science laboratory course.

M**9.11 Module: Measurement and Control Systems (BSc-Modul 11, MRT) [M-MACH-102564]**

Responsible: Prof. Dr.-Ing. Christoph Stiller
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 7	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 1 term	Language German/English	Level 3	Version 2
--------------	-----------------------------------	--------------------------------	--------------------	----------------------------	------------	--------------

Mandatory	
T-MACH-104745	Basics in Measurement and Control Systems

Competence Certificate

Type of Examination: written exam

Duration of Examination: 150 minutes

Prerequisites

none

Competence Goal

- Students are able to name, describe and explain control principles applied to physical quantities.
- They are able to name, analyze and assess system theoretic characteristics of dynamical systems.
- Students are able to represent real systems in a system theoretic model and to assess the suitability of a given model.
- Students are able to apply methods for controller design and to analyze their properties.
- Students are able to select appropriate principles of metrology and to model, analyze and assess measurement setups.
- Students are able to quantify and assess measurement uncertainties.

Content

- Dynamic systems
- Properties of important systems and modeling
- Transfer characteristics and stability
- Controller design
- Fundamentals of measurement
- Estimation
- Sensors
- Introduction to digital measurement

Module grade calculation

result of exam

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

84 hours presence time, 126 hours selfstudies

Recommendation

Fundamentals in physics and electrical engineering, ordinary linear differential equations, Laplace transform

T-MACH-110955	Mechanical Design III, Tutorial	1 CR	Matthiesen
T-MACH-110956	Mechanical Design IV, Tutorial	1 CR	Matthiesen

Competence Certificate**Mechanical Design I and II:**

Preliminary examination: Successful participation in workshops in the field of mechanical Design I, as well as successful processing of output power in mechanical design II

Written examination in the field of mechanical engineering I and II: duration 90 min plus reading time

Mechanical Design III and IV:

Preliminary examination: Successful participation in workshops in the field of mechanical Design III & IV

- Examination in the field of mechanical Design III & IV consisting of written part with duration 60 min plus reading time and
- constructive part with duration 180 min plus reading time

Prerequisites

None

Competence Goal

In mechanical design, students acquire skills in analysis and synthesis using examples (= leading examples). The examples include individual machine elements such as bearings or springs as well as more complex systems such as gears or clutches. After completing the machine design course, the students can apply the learned contents to further technical systems - even those not known from the lecture - by transferring the exemplary learned operating principles and basic functions to other contexts. This enables students to independently analyze unknown technical systems and to synthesize systems suitable for given problems.

Content**MKL I:**

- Introduction to product development
- Springs
- Tools for visualization (technical drawing)
- Technical systems
- Bearings and guides

MKL II:

- Basics of the design
- Basics of screw connections
- Basics Seals

MKL III:

- Component connections
- Tolerances and clearance
- Transmission

MKL IV:

- Clutches
- Fluid Technology
- Dimensioning
- Electrical machines

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload**MKL1:****presence: 33,5 h**

M**9.13 Module: MF A: Global Production Management [M-MACH-103351]**

Responsible: Prof. Dr.-Ing. Gisela Lanza
Organisation: KIT Department of Mechanical Engineering

Part of: Majors in Mechanical Engineering (International)

Credits 16	Grading scale Grade to a tenth	Recurrence Each term	Duration 2 terms	Language English	Level 3	Version 2
---------------	-----------------------------------	-------------------------	---------------------	---------------------	------------	--------------

Mandatory			
T-MACH-106731	Global Production Engineering (MEI)	4 CR	Lanza
T-MACH-105379	Global Logistics	4 CR	Furmans
SP A: Global Production Management (Election: at least 8 credits)			
T-MACH-105381	Virtual Engineering (Specific Topics)	4 CR	Ovtcharova
T-MACH-106732	Automated Production Systems (MEI)	4 CR	Fleischer

Competence Certificate

Oral exams: duration approx. 5 min per credit point

Amount, type and scope of the success control can vary according to the individually choice.

Prerequisites

None

Competence Goal

The students acquire in the mandatory subjects profound knowledge about the scientific theories, principles and methods of Production Engineering. Afterwards they are able to evaluate and design complex production systems according to problems of manufacturing and process technologies, materials handling, handling techniques, information engineering as well as production organisation and management.

After completion this module, the students are able

- to analyse and solve planning and layout problems on the level of the enterprise, production, processes and work tasks,
- to plan and control a production,
- to evaluate and configure the quality and efficiency of production, processes and products.

Content

The aim of "SP A: Global Production Management" is to present the challenges of globally operating companies and to give an overview of the central aspects of global production networks as well as to gain in-depth knowledge of common methods and procedures for designing them. For this purpose, methods for site selection, approaches for the site-specific adaptation of production technologies as well as planning approaches for setting up a new production location will be imparted during the module. The module will be rounded off by presenting Industry 4.0 methods and technologies.

The topics in detail are:

- Framework conditions and influencing factors of global production (historical development, goals, opportunities and risks)
- Site selection
- Site-specific production adaptation
- Planning a new production site
- Design and management of global production networks
- Integration of Industry 4.0 methods and technologies

Workload

The workload is approx. 480 hours, corresponding to 16 credit points. This results in 120 hours of presence time for courses with a volume of eight SWS. A further 360 hours are spent in self-study.

Recommendation

none

Learning type

Lectures, seminars, workshops, excursions

M**9.14 Module: MF B: Energy Engineering [M-MACH-103350]**

Responsible: Prof. Dr.-Ing. Hans-Jörg Bauer
Organisation: KIT Department of Mechanical Engineering
 Institute of Thermal Turbomachinery
Part of: Majors in Mechanical Engineering (International)

Credits 16	Grading scale Grade to a tenth	Recurrence Each term	Duration 2 terms	Language English	Level 3	Version 1
---------------	-----------------------------------	-------------------------	---------------------	---------------------	------------	--------------

Mandatory			
T-MACH-105220	Fundamentals of Energy Technology	8 CR	Badea, Cheng
SP B: Energy Engineering (Election: at least 8 credits)			
T-MACH-105213	Fundamentals of Combustion I	4 CR	Maas
T-MACH-105292	Heat and Mass Transfer	4 CR	Maas, Yu

Competence Certificate

See individual courses

Prerequisites

None

Competence Goal

After completion of SP B students are able

- to describe the elements of an energy system and their interactions,
- to list different conventional energy sources and assess their static range,
- to name the fluctuating supply of renewable energies such as wind, solar radiation, ocean currents and tides etc. and describe its effects on the energy system,
- to assess the technical boundary conditions of energy systems
- to derive approaches for an optimal mix of different energy technologies,
- to explain the operational principle of well-established power plants as well as of power plants based on renewables,
- to name the physical and chemical processes during energy conversion

Content

The aim of SP B "Energy Engineering" is to bring the students closer to the challenges of modern energy systems. The functional principles of conventional and regenerative power plant types are presented and the underlying physical principles of technical combustion and heat and mass transfer are explained. The students learn the basics to evaluate energy systems on a technical and economic basis.

Topics include:

- forms of energy
- energy sources: fossil fuels, nuclear energy, renewable energies
- energy demand structures
- principles of thermal and electrical power plants (conventional and renewable)
- physical basics of technical combustion
- stationary and transient heat and mass transfer phenomena
- environmental aspects of energy production
- role of renewable energies
- conversion, transport and storage of energy
- economic feasibility study of energy systems
- future of the energy sector

Workload

The workload is approx. 480 hours, corresponding to 16 credit points. This results in 120 hours of presence time for courses with a volume of eight SWS. A further 360 hours are spent in self-study.

T-MACH-105155	Vehicle Comfort and Acoustics II	4 CR	Gauterin
T-MACH-105210	Machine Dynamics	5 CR	Proppe

Competence Certificate

Oral exams: duration approx. 5 min. per credit point.

However, amount, type and scope of the success control can vary according to the individually choice.

Prerequisites

none

Competence Goal

The students know the movements and the forces at the vehicle and are familiar with active and passive safety. They have proper knowledge about operation of engines and alternative drives, the necessary transmission between engine and drive wheels and the power distribution. They have an overview of the components necessary for the drive and have the basic knowledge, to analyse, to evaluate, and to develop the complex system "vehicle".

Further learning objectives according to the selected courses of supplementary subjects.

Content

1. History and future of the automobile
2. Driving mechanics: driving resistances and driving performance, mechanics of longitudinal and lateral forces, active and passive safety
3. Drive systems: combustion engine, hybrid and electric drive systems
4. Transmissions: clutches (e.g. friction clutch, visco clutch), transmission (e.g. mechanical transmission, hydraulic fluid transmission)
5. Power transmission and distribution: drive shafts, cardan joints, differentials

Workload

The workload is approx. 480 hours, corresponding to 16 credit points. This results in 120 (135) hours of presence time for courses with a volume of eight (nine) SWS. A further 360 (345) hours are spent in self-study.

--------------	-----------------------------------	--------------------------------	--------------------	----------------------------	------------	--------------

Mandatory	
T-PHYS-108322	Wave and Quantum Physics

Competence Certificate

The assessment consists of a written exam according to Section 4(2), 1 of the examination regulation.

Prerequisites

None

Competence Goal

The students

- are familiar with the properties of waves and can discuss those
- can reflect on the principles of relativity
- comprehend the coherence of the particle and wave description of light and matter
- can explain the limits of wave physics
- are able to apply the Schrödinger-equation to basic problems in quantum mechanics
- can explain the basic properties of atoms, especially for the hydrogen atom
- can discuss fundamental aspects of the electronic properties of solids

Content

- Properties of waves
- Acoustic and electromagnetic waves
- Interference and diffraction
- Relativity
- Wave-particle dualism
- Basic properties of atoms
- Basic electronic properties of solids

Annotation

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

150 hours, consisting of attendance times (45), follow-up of the lecture including exam preparation and preparation of exercises (105)

M**9.18 Module: Production Operations Management [M-MACH-105106]**

Responsible: Prof. Dr.-Ing. Kai Furmans
Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering (Usage from 7/11/2019)

Credits 5	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 1 term	Language English	Level 3	Version 1
--------------	-----------------------------------	--------------------------------	--------------------	---------------------	------------	--------------

Mandatory						
T-MACH-110327	Production Operations Management		3 CR	Furmans		
T-MACH-110326	Production Operations Management-Project		2 CR	Furmans		

Competence Certificate

The success control takes place in the form of partial examinations in the individual courses of the module. These are a written exam (duration: 90 minutes) and a different type of examination. The module grade is made up of the grades of the courses in the module weighted by credit points.

Prerequisites

None

Competence Goal

If you successfully passed this course you will be able to:

- state the relevant technical terms of business administration, logistics and production engineering
- describe the interrelation between these technical terms
- describe the most important decision problems qualitatively and quantitatively
- apply the appropriate decision models to solve the respective decision problems
- critically evaluate the results and draw appropriate conclusions
- extend the learned methods and models by researching on your own

Content

The institutes alternate with each cycle. Basic skills about the planning and operation of a production plant are taught. The lecture covers the basics of operations and supply chain management as well as business management basics in accounting, investment calculation and legal forms.

Annotation

It is a joint module of the Institute of Materials Handling and Logistics (IFL) and the Institute of Production Science (WBK).

For the Bachelor's program Mechanical Engineering the module (including all brick details, exams and courses) is offered in German.

For the Bachelor's program Mechanical Engineering (International) the module (including all brick details, exams and courses) is offered in English.

Workload

Attendance time: 42 hours,

Self-study: 108 hours

Learning type

1. Lectures (Obligatory)
2. Tutorials (Obligatory)
3. Group work (Obligatory)
4. Oral defense of the group work (Obligatory)

M**9.19 Module: Supplementary Studies on Culture and Society [M-ZAK-106235]**

Responsible: Dr. Christine Mielke
Christine Myglas

Organisation:

Part of: Additional Examinations (Usage from 4/1/2023)

Credits 22	Grading scale Grade to a tenth	Recurrence Each term	Duration 3 terms	Language German	Level 3	Version 1
---------------	-----------------------------------	-------------------------	---------------------	--------------------	------------	--------------

Election notes

With the exception of the final oral exam and the practice module, students have to self-record the achievements obtained in the Supplementary Studies on Culture and Society in their study plan. ZAK records the achievements as "non-assigned" under "ÜQ/SQ-Leistungen". Further instructions on self-recording of achievements can be found in the FAQ at <https://campus.studium.kit.edu/> and on the ZAK homepage at <https://www.zak.kit.edu/begleitstudium-bak.php>. The title of the examination and the amount of credits override the modules placeholders.

If you want to use ZAK achievements **both for your interdisciplinary qualifications and for the supplementary studies**, please record them in the interdisciplinary qualifications first. You can then get in contact with the ZAK study services (stg@zak.kit.edu) to also record them in your supplementary studies.

In the in-depth module, achievements have to be obtained in three different areas. The areas are as follows:

- Technology & Responsibility
- Doing Culture
- Media & Aesthetics
- Spheres of Life
- Global Cultures

You have to obtain two achievements with 3 credits each and one achievement with 5 credits. To self-record achievements in the in-depth module, you first have to elect the matching partial achievement.

Note: If you registered for the Supplementary Studies on Sustainable Development before April 1st, 2023, self-recording an achievement in this module counts as a request in the sense of §20 (2) of the regulations for the Supplementary Studies on Culture and Society. Your overall grade for the supplementary studies will thus be calculated as the average of the examination grades, not as the average of the module grades.

Mandatory			
T-ZAK-112653	Basics Module - Self Assignment BAK	3 CR	Mielke, Myglas
In-depth Module (Election: 3 items)			
T-ZAK-112654	In-depth Module - Technology & Responsibility - Self Assignment BAK	3 CR	Mielke, Myglas
T-ZAK-112655	In-depth Module - Doing Culture - Self Assignment BAK	3 CR	Mielke, Myglas
T-ZAK-112656	In-depth Module - Media & Aesthetics - Self Assignment BAK	3 CR	Mielke, Myglas
T-ZAK-112657	In-depth Module - Spheres of Life - Self Assignment BAK	3 CR	Mielke, Myglas
T-ZAK-112658	In-depth Module - Global Cultures - Self Assignment BAK	3 CR	Mielke, Myglas
Mandatory			
T-ZAK-112660	Practice Module	4 CR	Mielke, Myglas
T-ZAK-112659	Oral Exam - Supplementary Studies on Culture and Society	4 CR	Mielke, Myglas

Competence Certificate

The monitoring is explained in the respective partial achievement.

They are composed of:

- minutes
- presentations
- a seminar paper
- an internship report
- an oral examination

After successful completion of the supplementary studies, the graduates receive a graded certificate and a KIT certificate.

Prerequisites

The offer is study-accompanying and does not have to be completed within a defined period of time. Enrolment or acceptance for graduation must be present when registering for the final examination.

KIT students register for the supplementary studies by selecting this module in the student portal and self-checking a performance. In addition, registration for the individual courses is necessary, which is possible shortly before the beginning of each semester.

The course catalogue, statutes (study regulations), registration form for the oral exam, and guides for preparing the various written performance requirements can be found as downloads on the ZAK homepage at www.zak.kit.edu/begleitstudium-bak.

Competence Goal

Graduates of the Supplementary Studies on Culture and Society demonstrate a sound basic knowledge of conditions, procedures and concepts for analysing and shaping fundamental social development tasks in connection with cultural topics. They have gained a well-founded theoretical and practical insight into various cultural studies and interdisciplinary topics in the field of tension between culture, technology and society in the sense of an expanded concept of culture.

They are able to place the contents selected from the specialization module in the basic context as well as to analyse and evaluate the contents of the selected courses independently and exemplarily and to communicate about them scientifically in written and oral form. Graduates are able to analyse social topics and problem areas and critically reflect on them in a socially responsible and sustainable perspective.

Content

The Supplementary Studies on Culture and Society can be started from the 1st semester and is not limited in time. It comprises at least 3 semesters. The supplementary studies are divided into 3 modules (basics, in-depth studies, practice). A total of 22 credit points (ECTS) are earned.

The thematic elective areas of the supplementary studies are divided into the following 5 modules and their sub-topics:

Block 1Technology & Responsibility

Value change / ethics of responsibility, technology development / history of technology, general ecology, sustainability

Block 2Doing Culture

Cultural studies, cultural management, creative industries, cultural institutions, cultural policy

Block 3Media & Aesthetics

Media communication, cultural aesthetics

Block 4Spheres of Life

Cultural sociology, cultural heritage, architecture and urban planning, industrial science

Block 5Global Cultures

Multiculturalism / interculturalism / transculturalism, science and culture

Module grade calculation

The overall grade of the supplementary studies is calculated as an average of the grades of the examination performances weighted with credit points.

In-depth Module

- presentation 1 (3 ECTS)
- presentation 2 (3 ECTS)
- seminar paper incl. presentation (5 ECTS)
- oral examination (4 ECTS)

Annotation

With the Supplementary Studies on Culture and Society, KIT provides a multidisciplinary study offer as an additional qualification, with which the respective specialized study program is supplemented by interdisciplinary basic knowledge and interdisciplinary orientation knowledge in the field of cultural studies, which is becoming increasingly important for all professions.

Within the framework of the supplementary studies, students acquire in-depth knowledge of various cultural studies and interdisciplinary subject areas in the field of tension between culture, technology and society. In addition to high culture in the classical sense, other cultural practices, common values and norms as well as historical perspectives of cultural developments and influences are considered.

In the courses, conditions, procedures and concepts for the analysis and design of fundamental social development tasks are acquired on the basis of an expanded concept of culture. This includes everything created by humans - also opinions, ideas, religious or other beliefs. The aim is to develop a modern concept of cultural diversity. This includes the cultural dimension of education, science and communication as well as the preservation of cultural heritage. (UNESCO, 1982)

According to § 16 of the statutes, a reference and a certificate are issued by the ZAK for the supplementary studies. The achievements are also shown in the transcript of records of the degree program and, upon request, in the certificate. They can also be recognized in the interdisciplinary qualifications (see elective information).

Workload

The workload is made up of the recommended number of hours for the individual modules:

- basic module approx. 90 h
- in-depth module approx. 340 h
- practical module approx. 120 h

total: approx. 550 h

Learning type

- lectures
- seminars
- workshops
- practical course

Literature

Recommended reading of primary and specialized literature will be determined individually by each instructor.

M**9.20 Module: Supplementary Studies on Sustainable Development [M-ZAK-106099]**

Responsible: Dr. Christine Mielke
Christine Myglas

Organisation:

Part of: Additional Examinations (Usage from 4/1/2023)

Credits 19	Grading scale Grade to a tenth	Recurrence Each term	Duration 3 terms	Language German	Level 3	Version 1
---------------	-----------------------------------	-------------------------	---------------------	--------------------	------------	--------------

Election notes

With the exception of the final oral exam, students have to self-record the achievements obtained in the Supplementary Studies on Sustainable Development in their study plan. ZAK records the achievements as "non-assigned" under "ÜQ/SQ-Leistungen". Further instructions on self-recording of achievements can be found in the FAQ at <https://campus.studium.kit.edu/> and on the ZAK homepage at <https://www.zak.kit.edu/begleitstudium-bene>. The title of the examination and the amount of credits override the modules placeholders.

If you want to use ZAK achievements **both for your interdisciplinary qualifications and for the supplementary studies**, please record them in the interdisciplinary qualifications first. You can then get in contact with the ZAK study services (stg@zak.kit.edu) to also record them in your supplementary studies.

In the elective module, you need to obtain 6 credits worth of achievements in two of the four areas:

- Sustainable Cities & Neighbourhoods
- Sustainable Assessment of Technology
- Subject, Body, Individual: The Other Side of Sustainability
- Sustainability in Culture, Economy & Society

Usually, two achievements with 3 credits each have to be obtained. To self-record achievements in the elective module, you first have to elect the matching partial achievement.

Note: If you registered for the Supplementary Studies on Sustainable Development before April 1st, 2023, self-recording an achievement in this module counts as a request in the sense of §19 (2) of the regulations for the Supplementary Studies on Sustainable Development. Your overall grade for the supplementary studies will thus be calculated as the average of the examination grades, not as the average of the module grades.

Mandatory			
T-ZAK-112345	Basics Module - Self Assignment BeNe	3 CR	Myglas
Elective Module (Election: at least 6 credits)			
T-ZAK-112347	Elective Module - Sustainable Cities and Neighbourhoods - Self Assignment BeNe	3 CR	
T-ZAK-112348	Elective Module - Sustainability Assessment of Technology - Self Assignment BeNe	3 CR	
T-ZAK-112349	Elective Module - Subject, Body, Individual: the Other Side of Sustainability - Self Assignment BeNe	3 CR	
T-ZAK-112350	Elective Module - Sustainability in Culture, Economy and Society - Self Assignment BeNe	3 CR	
Mandatory			
T-ZAK-112346	Specialisation Module - Self Assignment BeNe	6 CR	Myglas
T-ZAK-112351	Oral Exam - Supplementary Studies on Sustainable Development	4 CR	

Competence Certificate

The monitoring is explained in the respective partial achievement .

They are composed of:

- protocols
- a reflection report
- presentations
- presentations
- the elaboration of a project work
- an individual term paper

Upon successful completion of the supplementary studies, graduates receive a graded report and a certificate issued by ZAK.

Prerequisites

The course is offered during the course of study and does not have to be completed within a defined period of time. Enrolment is required for all performance assessments of the modules of the supplementary studies. Participation in the supplementary studies is regulated by § 3 of the statutes.

KIT students register for the supplementary studies by selecting this module in the student portal and self-booking a performance. Registration for courses, performance assessments and examinations is regulated by § 6 of the Statutes and is usually possible shortly before the beginning of the semester.

The course catalogue, statutes (study regulations), registration form for the oral exam and guidelines for preparing the various written performance requirements can be found as downloads on the ZAK homepage at <http://www.zak.kit.edu/begleitstudium-bene>.

Competence Goal

Graduates of the supplementary studies in sustainable development acquire additional practical and professional competencies. Thus, the supplementary study program enables the acquisition of basics and initial experience in project management, trains teamwork skills, presentation skills and self-reflection, and also creates a fundamental understanding of sustainability that is relevant for all professional fields.

Graduates are able to analyse social topics and problem areas and critically reflect on them in a socially responsible and sustainable perspective. They are able to place the contents selected from the modules "Elective" and "Advanced" in the basic context as well as to independently and exemplarily analyse and evaluate the contents of the selected courses and to scientifically communicate about them in written and oral form.

Content

The supplementary study program Sustainable Development can be started from the 1st semester and is not limited in time. The wide range of courses offered by ZAK makes it possible to complete the program usually within three semesters. The supplementary studies comprise 19 credit points (LP). It consists of three modules: Basic Module, Elective Module and Advanced Module.

The thematic elective areas of the supplementary studies are divided into the following 4 modules and their subtopics in Module 2 (elective module):

Block 1 Sustainable Cities and Neighbourhoods

The courses provide an overview of the interaction of social, ecological, and economic dynamics in the microcosm of the city.

Block 2 Sustainability Assessment of Technology

Mostly based on ongoing research activities, methods and approaches of technology assessment are elaborated.

Block 3 Subject, Body, Individual: The other Side of Sustainability

Different approaches are presented to the individual perception, experience, shaping and responsibility of relationships to the environment and to oneself.

Block 4 Sustainability in Culture, Economy & Society

Courses usually have an interdisciplinary approach, but may also focus on one of the areas of culture, economics or society, both in application and in theory.

The core of the supplementary studies is a case study in the specialization area. In this project seminar, students conduct sustainability research with practical relevance themselves. The case study is supplemented by an oral examination with two topics from module 2 (elective module) and module 3 (in-depth module).

Module grade calculation

The overall grade of the supplementary studies is calculated as an average of the grades of the examination performances weighted with credit points.

Elective module

- Presentation 1 (3 ECTS)
- Presentation 2 (3 ECTS)

Advanced module

- individual term paper (6 ECTS)
- oral examination (4 ECTS)

Annotation

The Supplementary Studies on Sustainable Development at KIT is based on the conviction that a long-term socially and ecologically compatible coexistence in the global world is only possible if knowledge about necessary changes in science, economy and society is acquired and applied.

The interdisciplinary and transdisciplinary Studies on Sustainable Development enables diverse access to transformation knowledge as well as basic principles and application areas of sustainable development. According to the statutes § 16, a certificate is issued by the ZAK for the complementary studies.

The achievements are also shown in the transcript of records of the degree program and, upon request, in the certificate. They can also be recognized in the interdisciplinary qualifications (see elective information).

In the specialised studies, modules and partial achievements can be recognised within the framework of the additional achievements or e.g. the interdisciplinary qualifications. This must be regulated via the respective subject study programme.

The focus is on experience- and application-oriented knowledge and competences, but theories and methods are also learned. The aim is to be able to represent one's own actions as a student, researcher and later decision-maker as well as an individual and part of society under the aspect of sustainability.

Sustainability is understood as a guiding principle to which economic, scientific, social and individual actions should be oriented. According to this, the long-term and socially just use of natural resources and the material environment for a positive development of global society can only be addressed by means of integrative concepts. Therefore, "education for sustainable development" in the sense of the United Nations programme plays just as central a role as the goal of promoting "cultures of sustainability". For this purpose, practice-centred and research-based learning of sustainability is made possible and the broad concept of culture established at ZAK is used, which understands culture as habitual behaviour, lifestyle and changing context for social actions.

The supplementary study programme conveys the basics of project management, trains teamwork skills, presentation skills and self-reflection. Complementary to the specialised studies at KIT, it creates a fundamental understanding of sustainability, which is important for all professional fields. Integrative concepts and methods are essential: in order to use natural resources in the long term and to shape the global future in a socially just way, not only different disciplines, but also citizens, practitioners and institutions must work together.

Workload

The workload is made up of the number of hours of the individual modules:

- Basic module approx. 180 h
- Elective module approx. 150 h
- Consolidation module approx. 180 h

Total: approx. 510 h

Learning type

- lectures
- seminars
- workshops

Literature

Recommended reading of primary and specialist literature is determined individually by the respective lecturer.

M**9.21 Module: Technical Thermodynamics (BSc-Modul 05, TTD) [M-MACH-102574]**

Responsible: Prof. Dr. Ulrich Maas

Organisation: KIT Department of Mechanical Engineering

Part of: Fundamentals of Engineering

Credits 15	Grading scale Grade to a tenth	Recurrence Each winter term	Duration 2 terms	Language German/English	Level 3	Version 2

T-MACH-105204	Excercises in Technical Thermodynamics and Heat Transfer I <i>This item will not influence the grade calculation of this parent.</i>	0 CR	Maas
T-MACH-105288	Excercises in Technical Thermodynamics and Heat Transfer II <i>This item will not influence the grade calculation of this parent.</i>	0 CR	Maas

Competence Certificate

See individual courses

Prerequisites

None

Competence Goal

The students acquire the competency to master the fundamentals of thermodynamics and the ability to apply this knowledge to problem-solving in various branches of mechanical engineering and especially in the energy technology sector.

An integral part of the module is that students can define the fundamental laws of thermodynamics and their applications. The students are competent in describing and comparing the main processes in energy conversion that are important in mechanical engineering. Using tools also applied in industry, they are capable of analyzing and rating the efficiency of processes. The students are capable of discussing the thermodynamic correlation of ideal gas mixtures, real gases, and humid air, as well as explaining the properties on a molecular basis and analyzing them with the help of the laws of thermodynamics. Furthermore, the students are capable of explaining chemical reactions in the context of thermodynamics as well as defining and applying the heat transfer mechanisms.

Content

Thermodynamics I:

- System, properties of state
- Absolute temperature, model systems
- 1st law of thermodynamics for resting and moving systems
- Entropy and 2nd law of thermodynamics
- Behavior of real substances described by tables, diagrams and equations of state
- Machine processes
- Mixtures of ideal and real compounds

Thermodynamics II:

- Repetition of the topics of "Thermodynamics and Heat Transfer I"
- Behavior of mixtures
- Moist air
- Kinetic theory of gases
- Behavior of real substances described by equations of state
- Chemical reactions and applications of the laws of thermodynamics to chemical reactions
- Reaction kinetics
- Heat Transfer

V**Automated Production Systems (MEI)**3150012, SS 2024, 2 SWS, Language: English, [Open in study portal](#)

**Lecture (V)
Blended (On-Site/Online)**

Content

The lecture provides an overview of the structure and functioning of automated production systems. In the introduction chapter the basic elements for the realization of automated production systems are given. This includes:

- Drive and control technology
- Handling technology for handling work pieces and tools
- Industrial Robotics
- automatic machines, cells, centers and systems for manufacturing and assembly
- planning of automated manufacturing systems

In the second part of the lecture, the basics are illustrated using implemented manufacturing processes for the production of automotive components. The analysis of automated manufacturing systems for manufacturing of defined components is also included.

Learning Outcomes:

The students ...

- are able to analyze implemented automated manufacturing systems and describe their components.
- are capable to assess the implemented examples of implemented automated manufacturing systems and apply them to new problems.
- are able to name automation tasks in manufacturing plants and name the components which are necessary for the implementation of each automation task.

Organizational issues

Competence Certificate

Written examination

Duration: 120 minutes

Auxiliary means: none

Prerequisites

The brick "T-MACH-102203 - Automotive Engineering I" is not started or finished. The bricks "T-MACH-100092 - Grundlagen der Fahrzeugtechnik I" and "T-MACH-102203 - Automotive Engineering I" can not be combined.

Below you will find excerpts from events related to this course:

V**Automotive Engineering I**

2113805, WS 23/24, 4 SWS, Language: German, [Open in study portal](#)

Lecture (V)
On-Site

Content

1. History and future of the automobile
2. Driving mechanics: driving resistances and driving performance, mechanics of longitudinal and lateral forces, active and passive safety
3. Drive systems: combustion engine, hybrid and electric drive systems
4. Transmission: clutches (e.g. friction clutch, visco clutch), transmission (e.g. mechanical transmission, hydraulic fluid transmission)
5. Power transmission and distribution: drive shafts, cardan joints, differentials

Learning Objectives:

The students know the movements and the forces at the vehicle and are familiar with active and passive safety. They have proper knowledge about operation of engines and alternative drives, the necessary transmission between engine and drive wheels and the power distribution. They have an overview of the components necessary for the drive and have the basic knowledge, to analyze, to evaluate, and to develop the complex system "vehicle".

1. Chassis: Wheel suspensions (rear axles, front axles, kinematics of axles), tyres, springs, damping devices
2. Steering elements: Manual steering, servo steering, steer by wire
3. Brakes: Disc brake, drum brake, comparison of designs

Learning Objectives:

The students have an overview of the modules which are necessary for the tracking of a motor vehicle and the power transmission between vehicle bodywork and roadway. They have knowledge of different wheel suspensions, tyres, steering elements, and brakes. They know different design versions, functions and the influence on driving and braking behavior. They are able to correctly develop the appropriate components. They are ready to analyze, to evaluate, and to optimize the complex interaction of the different components under consideration of boundary conditions.

T**10.10 Course: Bachelor's Thesis [T-MACH-108685]**

Responsible: Prof. Dr.-Ing. Martin Heilmayer
Organisation: KIT Department of Mechanical Engineering
Part of: M-MACH-103722 - Bachelor's Thesis

Type	Credits	Grading scale	Recurrence	Version
Final Thesis	12	Grade to a third	Each term	1

Competence Certificate

The bachelor thesis is designed to show that the student is able to deal with a problem of his/her subject area in an independent manner and within the given period of time using scientific methods.

The work load of the bachelor thesis corresponds to 12 ECTS. The maximal processing time of the bachelor thesis takes three months. The date of issue of the subject has to be fixed by the supervisor and the student and to be put on record at the examination board. The subject of the bachelor thesis may be only returned once and only within the first month of processing time.

On a reasoned request of the student, the examination board can extend the processing time by up to one month. If the bachelor thesis is not completed in time, this examination is "failed" (5,0), unless the student is not responsible.

The bachelor thesis is to be evaluated by not less than a professor or a senior scientist according to § 14 Abs. 3 Ziff. 1 KITG and another examiner. Generally, one of the two examiners is the person who has assigned the thesis. If the examiners do not agree, the bachelor thesis is graded by the examination board within this assessment; another expert can be appointed too. The bachelor thesis has to be graded within a period of six weeks after the submission.

Prerequisites

The requirement for admission to the bachelor thesis module are 120 ECTS. As to exceptions, the examination board decides on a request of the student (see § 14 (1) SPO).

Modeled Conditions

The following conditions have to be fulfilled:

1. You need to have earned at least 120 credits in the following fields:
 - Fundamentals of Engineering
 - International Project Management and Soft Skills
 - Majors in Mechanical Engineering (International)

Final Thesis

This course represents a final thesis. The following periods have been supplied:

Submission deadline 3 months

Maximum extension period 1 months

Correction period 6 weeks

Annotation

The workload for the preparation of the bachelor thesis is about 360 hours.

T**10.11 Course: Basics in Measurement and Control Systems [T-MACH-104745]****Responsible:** Prof. Dr.-Ing. Christoph Stiller**Organisation:** KIT Department of Mechanical Engineering**Part of:** M-MACH-102564 - Measurement and Control Systems

V**Measurement and Control Systems**2137301, WS 23/24, 3 SWS, Language: German, [Open in study portal](#)**Lecture (V)
On-Site**

Content**Lehrinhalt (EN):**

- 1 Dynamic systems
- 2 Properties of important systems and modeling
- 3 Transfer characteristics and stability
- 4 Controller design
- 5 Fundamentals of measurement
- 6 Estimation
- 7 Sensors
- 8 Introduction to digital measurement

Lernziele (EN):

Measurement and control of physical entities is a vital requirement in most technical applications. Such entities may comprise e.g. pressure, temperature, flow, rotational speed, power, voltage and electrical current, etc.. From a general perspective, the objective of measurement is to obtain information about the state of a system while control aims to influence the state of a system in a desired manner. This lecture provides an introduction to this field and general systems theory. The control part of the lecture presents classical linear control theory. The measurement part discusses electrical measurement of non-electrical entities.

Voraussetzungen (EN)

Fundamentals in physics and electrical engineering; ordinary linear differential equations; Laplace transform

Nachweis (EN)

written exam; duration 2,5 h; paper reference materials only (no calculator)

Arbeitsaufwand (EN):

210 hours

V**Basics of Manufacturing Technology (MEI)**

3118092, WS 23/24, 2 SWS, Language: English, [Open in study portal](#)

**Lecture (V)
On-Site**

Content

The objective of the lecture is to classify the manufacturing technology within the wider context of production engineering, to provide an overview of the different manufacturing processes and to establish basic process knowledge of the common processes. The lecture conveys the basic principles of manufacturing technology and deals with the manufacturing processes based on example components according to their classification into main groups regarding technical and economic aspects. Regard is paid to classic manufacturing processes as well as new developments like additive manufacturing processes.

The following topics will be covered:

- Primary processing (casting, plastics engineering, sintering, additive manufacturing processes)
- Forming (sheet-metal forming, massive forming)
- Cutting (machining with geometrically defined and geometrically undefined cutting edges, separating, abrading)
- Joining
- Coating
- Heat treatment and surface treatment

Learning Outcomes:

The students ...

- are able to classify the manufacturing processes by their general functionality according to the specific main groups (DIN 8580).
- have the ability to declare and explain the function of the significant manufacturing processes of the main groups (DIN 8580).
- are enabled to describe the characteristic process features (geometry, materials, accuracy, tools, machines) of the significant manufacturing processes of the main groups (DIN 8580).
- have the ability to derive the relevant process specific technical advantages and disadvantages of the characteristic process features.
- are enabled to perform a selection of suitable manufacturing processes for given components.
- are enabled to classify the required manufacturing processes in the expiry of a process chain for the production of given sample products.

Workload:

regular attendance: 21 hours

self-study: 99 hours

Seminar (S)
On-Site

1130206, WS 23/24, 2 SWS, Language: English, [Open in study portal](#)

Content

One of the first steps towards intercultural competence is to recognize that we are all susceptible to unconscious bias and need support in understanding and overcoming hidden prejudices. This course examines the key characteristics and different kinds of unconscious bias that can influence our relationships in cross-cultural situations. Participants will learn why the brain receives and processes information in a biased manner, how to recognize unconscious bias, how bias can affect attitudes, behaviour and decision making, and why recognizing unconscious bias benefits us all.

Topics include:

- analyzing the neuroscience of a productive brain
- understanding the characteristics and reasons of unconscious bias
- examining the different kinds of unconscious bias
- recognizing unconscious bias in the intercultural setting and how to manage it
- developing intercultural competence

2-4 LP

Recommendation

The content of the Basics Module is helpful.

T

10.23 Course: Elective Module - Sustainable Cities and Neighbourhoods - Self Assignment BeNe [T-ZAK-112347]

Organisation: University

Part of: M-ZAK-106099 - Supplementary Studies on Sustainable Development

Type	Credits	Grading scale	Version
Examination of another type	3	Grade to a third	1

Competence Certificate

Examination of another kind according to § 7 section 7 in the form of a presentation in the selected course.

Prerequisites

Prerequisite for the 'Oral Examination' is the successful completion of Modules 1 and 3 and the required elective sections in Module 2.

Self service assignment of supplementary studies

This course can be used for self service assignment of grade aquired from the following study providers:

- Zentrum für Angewandte Kulturwissenschaft und Studium Generale
- ZAK Begleitstudium

Recommendation

The content of the Basics Module is helpful.

T**10.24 Course: Electrical Engineering and Electronics [T-ETIT-108386]**

Responsible: TT-Prof. Dr. Giovanni De Carne
Organisation: KIT Department of Electrical Engineering and Information Technology
Part of: M-ETIT-104049 - Electrical Engineering

Type	Credits	Grading scale	Recurrence	Version
Written examination	8	Grade to a third	Each winter term	1

Events					
WT 23/24	2306350	Electrical Engineering and Electronics for Mechanical Engineers	4 SWS	Lecture	De Carne
WT 23/24	2306351	Tutorial for 2306350 Electrical Engineering and Electronics for Mechanical Engineers	2 SWS	Practice	De Carne, Digel, Bremer
Exams					
WT 23/24	7306350	Electrical Engineering and Electronics for Mechanical Engineers			Doppelbauer

Competence Certificate

The control of success takes place by a written examination, duration 3 hours.

By successfully completing two additional exercise sheets (on a voluntary basis), a bonus of up to 6 exam points can be earned (corresponds to a maximum grade improvement of the written exam by the value 0.3 or 0.4).

Prerequisites

none

Annotation

Exam will be held in english language.

On-Site****Content**

Kinematics: Cartesian, cylindrical and natural coordinates. Time derivatives in moving reference frames, angular velocities of reference frames.

Kinetics of a particle:

Newton's axiom, Principle of d'Alembert, work of a force, kinetic and potential energies, principle of linear momentum, principle of moment of momentum, kinetics in moving reference systems

Systems of particles:

Principle of center of mass, Principle of moment of momentum, impacts between particles, systems with variable mass, applications.

Plain motion of rigid bodies:

Pure translation, pure rotation, general plain motion. Instantaneous center of rotation, Kinetics, moment of momentum, principle of work and principle of energy conservation for a rotation around a space-fixed axis. Mass moment of inertia, parallel-axis-theorem. Principle of linear momentum and principle of moment of momentum for arbitrary plain motion. Principle of d'Alembert for plain motion. Principles of linear and moment of momentum in integral form. Applications for impact problems.

Organizational issues

Die Lehrveranstaltung TM III (MACH SPO: 2015, MIT SPO: 2016) wird letztmalig im Wintersemester 2023/24 angeboten. Die Lehrinhalte werden zu einem großen Teil ab Wintersemester 2024/25 im Rahmen der TM III (MACH und MIT: SPO 2023) behandelt. Die Vorleistung für Studierende in den alten SPOs (MACH SPO: 2015, MIT SPO: 2016) werden weiterhin in einer angepassten Form angeboten, die zu gegebener Zeit über ILIAS kommuniziert wird.

Blended (On-Site/Online)**

Content

The students know some possibilities to describe the position and orientation of a rigid body for an arbitrary 3d motion. They realize that the rotational velocity is a vector which may change both magnitude and orientation. They can apply the principle of linear momentum and the principle of moment of momentum to a spatial motion of a rigid body and notice that this is much more complicated compared to a plain motion. The students can calculate the coordinates of the inertia tensor. They see that many effects which may be seen with gyroscopes can be explained by the principle of moment of momentum. For systems with many particles or bodies but only few degrees of freedom the students know that the application of analytical methods like the principle of D'Alembert in Lagrangian form or the Lagrange equations may be advantageous. They can apply these principles to simple problems. For vibration problems the students can interpret the most important expressions like eigenfrequency, resonance or eigenvalue problem. Forced vibration of systems with the degree of freedom can be investigated by the students.

T**10.28 Course: Environmentally Induced Migrants (EIMs) [T-ZAK-112570]****Organisation:**

V**Environmentally Induced Migrants (EIMs) – Drivers and international protection**

1130411, WS 23/24, 2 SWS, Language: English, [Open in study portal](#)

Seminar (S)
Blended (On-Site/Online)

Content

Environmental disasters displace every year millions of people around the world, doubling the number of displaced persons due to conflicts and violence. While the latter have different options of international protection, yet no international legal status has been recognized to the Environmentally-Induced Migrants (EIMs). Considering that climate change contributes to the increase of environmental disaster and therefore displacement, this type of mass migration is in the spotlight at United Nations conferences on climate change.

This course aims to clarify the complexity of the drivers behind this phenomenon to comprehend the characteristics of this particular migratory movement. This will allow the identification of those needs of EIM that must be addressed in possible legal protection. Students will be provided with basic knowledge of human rights and forced migrations instruments, environmental and climate change laws that are relevant to EIM. Finally, participants will be prepared and involved in a simulation of an international conference during which they will have to negotiate the protection for EIMs. No previous legal knowledge is required.

- understand the interactions between environmental changes and human livelihood.
- learn about international protections for forced migrations.
- gain insights into the current debate on climate change and its consequences on human mobility

2-3 ECTS**Literature**

During the seminar students will have to work in groups (simulations and exercises)

Final short essay for 1 extra credit (optional). Final essay is due on XXXXX

Good knowledge of English

Willingness to actively participate in group work during classes

V**Fluid Mechanics II**

2153512, WS 23/24, 3 SWS, Language: German, [Open in study portal](#)

**Lecture / Practice (VÜ)
On-Site**

Content

The students know how to derive the fundamental equations for mass and momentum conservation and can introduce material laws for fluids into those. They can discuss the physical meaning of the different terms in the Navier-Stokes-Equations. They are capable of simplifying the mathematical equations that describe the motion of fluids and can compute flow quantities for generic problems based on these simplified equations. This includes the calculation of static and dynamic forces acting from the fluid onto the solid as well as the detailed analysis of two-dimensional viscous flows.

tensor notation, fluid elements in continuum, Reynolds transport theorem, conservation of mass and momentum, continuity equation, constitutive law for Newtonian fluids, Navier-Stokes equations, angular momentum and energy conservation, integral form of the conservation equations, forces between fluids and solids, analytical solutions of the Navier-Stokes equations

**Lecture (V)
On-Site**

Content

The objective of the course is to train the students on state of the art knowledge about the challenging fields of energy industry and the permanent competition between the economical profitability and the long-term sustainability. The students obtain basic knowledge on thermodynamics relevant to the energy sector and comprehensive knowledge on the energy sector: demand, energy types, energy mix, installations for energy production (conventional, nuclear and renewable), transport and energy storage, environmental impact and future tendencies. Students are able to use methods of economic efficiency optimization for the energy sector in a creative way, practice oriented, also specifically trained during the corresponding tutorial. The students are qualified for further training in energy engineering related fields and for (also research-related) professional activity in the energy sector.

The following relevant fields of the energy industry are covered:

- Energy demand and energy situation
- Energy types and energy mix
- Basics. Thermodynamics relevant to the energy sector
- Conventional fossil-fired power plants
- Combined Cycle Power Plants
- Cogeneration
- Nuclear energy
- Regenerative energies: hydropower, wind energy, solar energy, other energy systems
- Energy demand structures. Basics of economic efficiency and calculus. Optimization
- Energy storage
- Transport of energy
- Power generation and environment. Future of the energy industry

V**Fundamentals of Energy Technology**3190923, SS 2024, 3 SWS, Language: English, [Open in study portal](#)**Lecture (V)
On-Site****Content**

The objective of the course is to train the students on state of the art knowledge about the challenging fields of energy industry and the permanent competition between the economical profitability and the long-term sustainability. The students obtain basic knowledge on thermodynamics relevant to the energy sector and comprehensive knowledge on the energy sector: demand, energy types, energy mix, installations for energy production (conventional, nuclear and renewable), transport and energy storage, environmental impact and future tendencies. Students are able to use methods of economic efficiency optimization for the energy sector in a creative way, practice oriented, also specifically trained during the corresponding tutorial. The students are qualified for further training in energy engineering related fields and for (also research-related) professional activity in the energy sector.

The following relevant fields of the energy industry are covered:

- Energy forms
- Thermodynamics relevant to energy industry
- Energy sources: fossil fuels, nuclear energy, renewable sources
- Energy industry in Germany, Europe and worldwide
- Power generation and environment
- Evaluation of energy conversion processes
- Thermal/electrical power plants and processes
- Transport of energy / energy carriers
- Energy storage
- Systems utilizing renewable energy sources
- Basics of economic efficiency and calculus / Optimisation
- Future of the energy industry

Content

Conveyor Systems

- Basic elements of conveyor systems
- Key figures
- Branching elements
- continuous/partially-continuous
- deterministic/stochastic switch
- Integration elements
- continuous/partially-continuous
- dispatching rules

Queueing Theory and Production Logistics

- Basic queueing systems
- Distributions
- $M|M|1$ and $M|G|1$ model
- Application on production logistics

Distribution Centers and Order Picking

- The location problem
- Distribution centers
- Inventory management
- Order picking

Vehicle Routing

- Types of vehicle routing problems
- Linear programming model and graph theoretic model
- Heuristics
- Supporting technologies

Optimization of Logistical Networks

- Objectives
- Cooperative strategies
- Supply chain management
- Implementation

Organizational issues

Attendance during lecture is required. Admission to the exam is only possible when attending the lecture.

V**Global Production Engineering (MEI)**3150040, SS 2024, 2 SWS, Language: English, [Open in study portal](#)**Lecture (V)
On-Site****Content**

Target of the lecture is to depict the challenges of global operating companies and to give an overview of central aspects and methods in production planning. The lecture will regard site-related production factors and give the basic steps in site-selection, before the planning of manufacturing systems is focused. Herein, not only the planning phases are regarded, but also the methods used.

The topics are:

- Challenges of global production
- Establishing of new production sites
- The basic steps in manufacturing system planning
- Steps and methods of factory planning
- Manufacturing and assembly planning. Assembly panning will be focused
- Layout and material flow of production sites
- Production planning and control basics

Learning Outcomes:

The students ...

- can explain the challenges of global production.
- can explain site-related production factors.
- can name the basic steps in site-selection.
- can explain the basic steps in planning a production site.
- are able to explain methods of production analysis, layout planning, production planning and control, etc.
- can apply the methods to new problems.
- can explain links between different planning steps.

T

10.37 Course: In-depth Module - Doing Culture - Self Assignment BAK [T-ZAK-112655]

Responsible: Dr. Christine Mielke
Christine Myglas

Organisation:

Part of: M-ZAK-106235 - Supplementary Studies on Culture and Society

Type	Credits	Grading scale	Version
Examination of another type	3	Grade to a third	1

Competence Certificate

At least two presentations must be given: An examination of another kind according to § 5 section 3 (3) in the form of a presentation in one of the chosen courses (3 ECT).

In a third seminar, either (a) a presentation is held (preliminary study achievement) which remains not graded and a topic-related term paper is submitted or (b) a written exam is taken.

The three courses can be selected individually from the 5 thematic blocks or – in exceptional cases and according to the agreement with the responsible lecturer – all three courses can be selected from one block in the sense of a specialization.

In addition, an oral examination is taken, which relates to the content of two of the chosen three courses.

Prerequisites

Prerequisite for the 'Oral Examination' is the successful completion of Modules 1 and 3 and the required elective sections in Module 2.

Self service assignment of supplementary stdues

This course can be used for self service assignment of grade aquired from the following study providers:

- Zentrum für Angewandte Kulturwissenschaft und Studium Generale
- ZAK Begleitstudium

Annotation

The content of the Basic Modul is helpful.

On-Site****Content**

Germans and other nationalities, who plan to study and work in the USA, will benefit greatly from this course. The premise is simple: understanding your culture and your own 'mental software' is a prerequisite to understanding other cultures. By first clarifying the (un-conscious) behavioral patterns of the Germans and then comparing them with Americans, we will increase cultural awareness, leading to more effective intercultural communications.

Topics include:

- Examining the term 'culture'
- Overcoming ethnocentrism
- Discovering American and German cultural values
- Contrasting communication styles of the Germans and Americans
- Negotiating and resolving German-American conflicts
- Becoming aware of the different developing stages of intercultural competence.

Content

successful lab course and written exam (2 h)

Taking part at the exam is possible only when lab course has been successfully completed

Lab course and lecture take place in summer and winter semester.

In the SS the lecture is held in English. The lab course is always bilingual.

Media:

slides to download

Documentation of the labcourse

basics of thermodynamics

thermal fluid machines

- steam turbines
- gas turbines
- combined-cycle plants
- turbines and compressors
- aircraft engines

hydraulic fluid machines

- operating performance
- characterization
- control
- cavitation
- wind turbines, propellers

internal combustion engines

- characteristic parameters
- engine parts
- kinematics
- engine processes
- emissions

regular attendance: 48 h, self-study: 160 h

The students can name and describe basic energy conversion processes and energy converting machines. They can explain the application of these energy conversion processes in various machines. They can analyze and evaluate the processes and machines in terms of functionality and efficiency and they are able to solve basic technical problems in terms of operating the machines.

Competence Certificate

oral exam, about 25 minutes

Prerequisites

Lab course must be finished successfully prior to the registration for the oral exam.

Modeled Conditions

The following conditions have to be fulfilled:

1. The course T-MACH-105146 - Materials Science Lab Course must have been passed.

Annotation

The workload for the lecture Materials Science I & II is 165 h per semester and consists of the presence during the lectures (WS: 4 SWS, SS: 2SWS) and the exercises (1 SWS per WS and 1 SWS per SS) as well as preparation and rework time at home.

Below you will find excerpts from events related to this course:

V**Materials Science and Engineering I for mach, phys**2173550, WS 23/24, 4 SWS, Language: German, [Open in study portal](#)**Lecture (V)
On-Site****Content**

Atomic structure and atomic bonds

Structures of crystalline solids

Defects in crystalline solids

Structure of amorphous and semi-crystalline solids

Alloys

Transport and transformation phenomena in the solid state

Microscopy methods

Characterization by means of X-rays, Neutrons and Electrons

Nondestructive testing of materials

Mechanical testing of materials

learning objectives:

The students are able to describe the relationship between atomic structure, microscopical observations, and properties of solid materials.

The students can describe the typical property profiles and can name applications for the most important engineering materials.

The students are able to describe standard materials characterization methods and can explain the evaluation of these methods. They can judge materials on base of the data obtained by these methods.

requirements:None, **Recommendations:** None.**workload:**

regular attendance: 53 hours

self-study: 157 hours

Literature

Vorlesungsskript; Videos, Übungsaufgabenblätter.

Ferrous materials

Non-ferrous metals and alloys

Engineering ceramics

Glasses

Polymers

Composites

learning objectives:

The students are able to describe the relationship between atomic structure, microscopical observations, and properties of solid materials.

The students can name representative materials for different material classes and can describe the differences.

The students are able to describe the basic mechanisms of hardening for ferrous and non-ferrous materials and reflect these mechanisms using phase and TTT diagrams.

The students can interpret given phase, TTT or other diagrams relevant for materials science, gather information from them and can correlate them regarding the microstructure evolution.

The students can describe the phenomena correlated with materials science in polymers, metals and ceramics and depict differences.

The students know about standard materials characterization methods and are able to asses materials on base of the data obtained by these methods.

requirements:

Materials Science and Engineering I

workload:

regular attendance: 42 hours

self-study: 108 hours

examination:

Combined with 'Materials Science and Engineering I'; oral; about 30 minutes

The successful participation in the lab course is obligatory for the admission to the examination.

Literature

Vorlesungsskript; Übungsaufgabenblätter;

Shackelford, J.F.

Verlag Pearson Studium, 2005

Materials Science and Engineering I (Tutorial)3173009, WS 23/24, 1 SWS, Language: English, [Open in study portal](#)**Practice (Ü)
On-Site**

Content

Exemplary calculations

learning objectives:

The students can apply the knowledge gained through the lecture as well as self-studies and transfer this knowledge to problems given.

They can carry out calculations independantly dealing with different subjects of materials science. Therefore, they are able to decide which formulas allow the calculation based on the question given.

They are able to discuss aspects of materials science both quantitatively and qualitatively and can present these results orally.

requirements:

Lecture Materials Science and Engineering II

V**Materials Science and Engineering II for mach, phys**

2174560, SS 2024, 3 SWS, Language: German, [Open in study portal](#)

Lecture (V)
On-Site

Content**Topics:**

Ferrous materials

Non-ferrous metals and alloys

Engineering ceramics

Glasses

Polymers

Composites

Learning Objectives:

The students are able to describe the relationship between atomic structure, microscopical observations, and properties of solid materials.

The students can name representative materials for different material classes and can describe the differences.

The students are able to describe the basic mechanisms of hardening for ferrous and non-ferrous materials and reflect these mechanisms using phase and TTT diagrams.

The students can interpret given phase, TTT or other diagrams relevant for materials science, gather information from them and can correlate them regarding the microstructure evolution.

The students can describe the phenomena correlated with materials science in polymers, metals and ceramics and depict differences.

The students know about standard materials characterization methods and are able to asses materials on base of the data obtained by these methods.

Requirements:

Materials Science and Engineering I

Workload:

regular attendance: 42 hours

self-study: 108 hours

Examination:

Combined with 'Materials Science and Engineering I'; oral; about 30 minutes

The successful participation in the lab course is obligatory for the admission to the examination.

Annotation

The workload for the lab course Materials Science is 90 h in total and consists of the presence during the 10 experiments (one week half-time, 4 hours per day) as well as preparation and rework time at home.

Below you will find excerpts from events related to this course:

V**Experimental Lab Course in Material Science**

2174597, SS 2024, 3 SWS, Language: German, [Open in study portal](#)

**Practical course (P)
On-Site**

Content

Performing and evaluating of laboratory experiments in the following topics:

Mechanical testing of materials

Nonmetallic materials

Microstructure and properties

Cyclic loading / fatigue

Influence of manufacturing technique on materials

learning objectives:

The students are able to describe the relationship between atomic structure, microscopical observations, and properties of solid materials.

The students can name standard materials characterization methods and can describe the execution of the tests as well as the evaluation of the results. The students are able to assess materials on base of the data obtained by these methods.

The students are capable to select appropriate experiments to clarify problems regarding the materials behaviour. They can describe the experimental procedures and can carry out experiments. They can derive material properties from data gained in experiments. They can interpret these properties regarding microstructure-property-relations.

requirements:

ST 2024	3146022	Mechanical Design IV Workshop	1 SWS	/	Dürer, Burkhardt
Exams					
ST 2024	76-T-MACH-105285	Mechanical Design IV, tutorial			Albers, Matthiesen, Dürer

Legend: Online, Blended (On-Site/Online), On-Site, Cancelled

Competence Certificate

Concomitant to the lecture, a workshop with 3 workshop sessions takes place over the semester. During the workshop the students are divided into groups and their mechanical design knowledge will be tested during a colloquium at the beginning of every single workshop session. The attendance is mandatory and will be controlled. The pass of the colloquia and the process of the workshop task are required for the successful participation.

Annotation

Knowledge from the Basic Module and the Elective Module is helpful.

T**10.57 Course: Presentation [T-MACH-108684]**

Responsible: Prof. Dr.-Ing. Martin Heilmayer
Organisation: KIT Department of Mechanical Engineering
Part of: M-MACH-103722 - Bachelor's Thesis

Type	Credits	Grading scale	Recurrence	Version
Completed coursework	3	pass/fail	Each term	1

Competence Certificate

The colloquium presentation must be held within 6 weeks after the submission of the bachelor thesis. The presentation should last around 20 minutes followed by a scientific discussion with the present expert audience. The students should show that they are able to independently present and discuss the content of their bachelor thesis according to scientific criteria.

Prerequisites

Bachelor Thesis has been started

Modeled Conditions

The following conditions have to be fulfilled:

1. The course T-MACH-108685 - Bachelor's Thesis must have been started.

Annotation

The workload for the presentation of the bachelor thesis is about 90 hours.

V**Production Operations Management**

3118031, WS 23/24, 3 SWS, Language: English, [Open in study portal](#)

Lecture / Practice (VÜ)
Blended (On-Site/Online)

Content

T-MACH-110326 - Production Operations Management-Project must have been completed successfully when registering for this course.

It is a joint lecture of the Institute of Materials Handling and Logistics (IFL) and the Institute of Production Science (wbk). The institutes alternate with each cycle.

The lecture covers the basics of operations and supply chain management as well as business management basics in accounting, investment calculation and legal forms.

If you successfully passed this course you will be able to:

- state the relevant technical terms of business administration, logistics and production engineering
- describe the interrelation between these technical terms
- describe the most important decision problems qualitatively and quantitatively
- apply the appropriate decision models to solve the respective decision problems
- critically evaluate the results and draw appropriate conclusions
- extend the learned methods and models by researching on your own

Attendance time: 25 hours,

Self-study: 65 hours

Organizational issues

Räume werden vom Institut bekannt gegeben.

Legend: Online, Blended (On-Site/Online), On-Site, Cancelled

Competence Certificate

For solving four case studies as a group work, a maximum of 100 points per case study and student will be awarded. The defense of the case studies will be assessed as an individual contribution with a maximum of 100 points. The maximum score of 500 points corresponds to a grade of 1.0. A detailed evaluation scheme will be provided to the students during the course.

Prerequisites

none

Below you will find excerpts from events related to this course:

V**Production Operations Management-Project**

3118032, WS 23/24, 1 SWS, Language: English, [Open in study portal](#)

**Project (PRO)
Blended (On-Site/Online)**

Content

Students are divided into groups for this course. Four case studies will be carried out in these groups. The results of the group work will be presented and evaluated in writing. Prerequisite for the participation in the case study is the previous successful participation in a multiple choice test, which can be repeated online several times in a given period. The result of the group work is presented and evaluated in writing. In addition, selected groups will present and defend their results.

After successful completion of the lecture you will be able to work alone and in a team

- to **name** the treated **technical terms** in the areas of production, logistics and business administration,
- to accurately **describe** the connections between these areas in a discussion with experts,
- to describe **qualitatively** and **quantitatively** the most important decision-making problems in this field,
- to use the corresponding qualitative and quantitative decision models,
- to critically **evaluate** their results and draw conclusions from them,
- as well as to expand the methods and models discussed through **own research**.

The participation of all members of the selected groups in the oral defenses is compulsory and will be controlled. Four written submissions must be passed. For the written submission the group receives a common grade, in the defense each group member is evaluated individually. The defenses are fully included in the grade, but they do not have to be passed in order to pass the entire event. The final score of the event consists of 80% of the written submissions and 20% of the defense evaluation.

It is a joint lecture of the Institute of Materials Handling and Logistics (IFL) and the Institute of Production Science (wbk). The institutes alternate with each cycle.

Attendance time: 17 hours,

Self-study: 43 hours

V

Steering of a Global Operating Company - The Robert BOSCH GmbH as an Example

2149663, WS 23/24, 2 SWS, Language: German, [Open in study portal](#)

Seminar (S)
On-Site

Content

The lecture series provides an insight into the main functional areas of a global company and is based on close interaction with the students. Top managers from Bosch explain the technical and business processes of a company using examples from their business areas. The tasks of the engineer working at an innovative and globally active automotive supplier is addressed. These range from technical competence and an understanding of economic aspects to questions of personnel responsibility.

In addition, insights are provided into the careers of the Bosch managers giving the lectures. The focus of the course is therefore not only on business processes but also on first-hand accounts of challenges, successes, failures and product and process innovations.

The topics in detail are:

- Introduction, Strategy, Innovation
- R&D, Product Development Process
- Production
- Quality Assurance
- Market, Marketing, Sales
- Aftermarket, Service
- Finance, Controlling
- Logistics
- Purchasing, Supply Chain
- IT
- HR, Leadership, Compliance

Learning Outcomes:

The students ...

- are able to deduce, understand and assess the structure of a global operating enterprise.
- are capable to identify and compare the work flows and processes within a global operating enterprise.
- are able to recognize and assess the problems within interfaces between functional and organizational units which are identified by the experts. Furthermore the students can develop solutions based on this knowledge in order to overcome these problems.

Workload:

regular attendance: 21 hours

self-study: 39 hours

V**The impact of sustainable steering: Insights for holistic decision-making**

1130701, WS 23/24, 2 SWS, Language: English, [Open in study portal](#)

Seminar (S)

Content

You can't manage what you don't measure – to make meaningful progress towards more sustainable practices, we are relying on accurate data and holistic insights. But why do we mostly still rely on "traditional reporting" which clearly reaches its limits in the context of sustainability? How can operations report and steer more holistically and thereby successfully achieve its sustainability ambitions? What are concrete methodologies and what might be potential limitations of these?

We all are involved in one way or another in decision making at different levels. To allow critically questioning existing indicators and formulating informed, sustainable decisions, this seminar aims at discussing answers to the above-mentioned questions by offering key insights into sustainable steering. A specific focus will be laid on concrete methodologies and the implementation of such in a business context.

Designed to be interactive, dialogue and active participation will be encouraged. No prior experience is necessary and participants from all backgrounds are welcomed, but a willingness to learn and contribute is a must.

Participants will present on a chosen topic.

On-Site****Content**

In the Tutorial exercises for the corresponding subjects of the lecture are presented. During the tutorial part of the tutorial exercises are presented and instructions for those exercises are given which have to be done as homework.

The homework is mandatory and is corrected by the tutors. A successful elaboration of the homework is necessary to take part in the final exam.

V**Vehicle Comfort and Acoustics I**

2113806, WS 23/24, 2 SWS, Language: German, [Open in study portal](#)

**Lecture (V)
On-Site**

Content

1. Perception of noise and vibrations
3. Fundamentals of acoustics and vibrations
3. Tools and methods for measurement, computing, simulation and analysis of noise and vibrations
4. The relevance of tire and chassis for the acoustic and mechanical driving comfort:
phenomena, influencing parameters, types of construction, optimization of components and systems, conflict of goals, methods of development

An excursion will give insights in the development practice of a car manufacturer or a system supplier.

Learning Objectives:

The students know what noises and vibrations mean, how they are generated, and how they are perceived by human beings. They have knowledge about the requirements given by users and the public. They know which components of the vehicle are participating in which way on noise and vibration phenomenon and how they could be improved. They are ready to apply different tools and methods to analyze relations and to judge them. They are able to develop the chassis regarding driving comfort and acoustic under consideration of goal conflicts.

V**Vehicle Comfort and Acoustics II**

2114825, SS 2024, 2 SWS, Language: German, [Open in study portal](#)

**Lecture (V)
Online**

Content

1. Summary of the fundamentals of acoustics and vibrations

2. The relevance of road surface, wheel imperfections, springs, dampers, brakes, bearings and bushings, suspensions, engines and drive train for the acoustic and mechanical driving comfort:

- phenomena
- influencing parameters
- types of construction
- optimization of components and systems
- conflicts of goals
- methods of development

3. Noise emission of motor vehicles

- noise stress
- sound sources and influencing parameters
- legal restraints
- optimization of components and systems
- conflict of goals
- methods of development

Learning Objectives:

The students have knowledge about the noise and vibration properties of the chassis components and the drive train. They know what kind of noise and vibration phenomena do exist, what are the generation mechanisms behind, which components of the vehicle participate in which way and how could they be improved. They have knowledge in the subject area of noise emission of automobiles: Noise impact, legal requirements, sources and influencing parameters, component and system optimization, target conflicts and development methods. They are ready to analyze, to judge and to optimize the vehicle with its single components regarding acoustic and vibration phenomena. They are also able to contribute competently to the development of a vehicle regarding the noise emission.

V**Virtual Engineering (Specific Topics)**

3122031, SS 2024, 2 SWS, Language: English, [Open in study portal](#)

Lecture (V)

On-Site

Content

Students can

- explain the basics of virtual engineering and name exemplary modeling tools and assign them to the corresponding methods and processes
- Formulate validation questions in the product development process and name obvious solution methods
- explain the basics of systems engineering and establish the connection to the product development process
- explain individual methods of the digital factory and present the functions of the digital factory in the context of the product creation process
- explain the theoretical and technical basics of Virtual Reality technology and show the connection to Virtual Engineering

Prerequisites

none

Annotation

The course "Working Methods in Mechanical Engineering (ATM/WME)" (including the workshops) will be offered for the last time in summer semester 2024. If you do not pass or cannot attend WME, from summer semester 25 onwards, you will have to attend the lecture " Scientific work and empirical research methods" with an ungraded written exam (2 credits) and another course (2 credits) from the range of key qualifications offered in the next version of this module. If you have any questions, please contact the ifab office: elisabeth.schlund@kit.edu

Below you will find excerpts from events related to this course:

V**Working Methods in Mechanical Engineering**2110969, SS 2024, 1 SWS, Language: English, [Open in study portal](#)Course (Ku)
Blended (On-Site/Online)**Organizational issues**

The course addresses students in the Bachelor program Mechanical Engineering in the **fourth** semester. Students in the Bachelor program Mechanical Engineering in other semesters as well as students in the Master program Mechanical Engineering or other programs, may participate in case of vacancies. The introductory lecture will take place once on 16.04.2024. The course consists of an e-learning course, which ends with an online test, and an accompanying self-study in small groups. The group meetings take place every 14 days during the lecture period. Registration for the groups takes place via ilias.

V**Workshop 'Working Methods in Mechanical Engineering' (IMT)**2142975, SS 2024, 1 SWS, Language: German, [Open in study portal](#)Others (sonst.)
Blended (On-Site/Online)

Content

Within the frame of a scientific conference the contents from the corresponding lesson will be implemented in a practical way. The students have to organise a scientific conference by themselves. The contributions have to be prepared by the students and will be presented within the frame of abstracts, conference articles, posters, and presentations.

1. part of the workshop - Organisation of a conference

- Structure of a conference
- Generation of workgroups - Committees
- Exchange of Informations between workgroups
- Decision-making based on the information available
- Decision-making based under limitation of time
- Gerartion of technical progam, budget, flyer etc. of the conference
- Definition of critera for abstracts - communication of criteria

2. part of the workshop - Investigation and writing of abstracts

- Investigation in Literatur / Patent Database
- Citation of scientific literature
- Writing of abstracts
- Evaluation of abstracts

3. part of the workshop - Writing of scientific conference contributions

- Structure of a scientific article
- Rules for scientific writing - style
- Citation - Sources and their citation
- Design of scientifi posters
- Design of a scientific presentation

4. part of the workshop - Moderation and presentation

- Presentation of the results of the workshop - oral presentations
- Presentation of posters
- Moderation of the confernce
